Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1:1000~1:2000
Reactivity:	Human, Rat, Mouse
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to Human ICAM-5.
Specificity:	ICAM-5 polyclonal antibody detects endogenous levels of ICAM-5 protein.
Formulation:	Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2.
Concentration:	1mg/ml
Conjugation:	Unconjugated
Storage:	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.
Stability:	1 year
Predicted Protein Size:	~ 180 kDa
Gene Name:	intercellular adhesion molecule 5
Database Link:	<u>Entrez Gene 7087 Human</u> <u>Q9UMF0</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** ICAM5 Rabbit Polyclonal Antibody – TA392412S

**Background:** Cell adhesion molecules are a family of closely related cell surface glycoproteins involved in cell-cell interactions during growth and are thought to playimportant, yet separate, roles in embryogenesis and development. The intracellular adhesion molecule-1 (ICAM-1), also referred to as CD54, is an integral membrane protein of the immunoglobulin superfamily and recognizes the  $\beta 2\alpha 1$  and  $\beta 2\alpha M$  integrins. ICAM-2 functions as a ligand for lymphocyte functionassociated antigen-1 (LFA-1) and is involved in leukocyte adhesion. ICAM-3 is highly expressed on the surface of human eosinophils, and when bound to ligand may inhibit eosinophil inflammatory responses and survival. ICAM-4, also known as LW glycoprotein, interacts with the integrins  $\alpha L\beta 2$ ,  $\alpha M\beta 2$ ,  $\alpha 4\beta 1$ , the  $\alpha V$  family and  $\alpha llb\beta 3$ , and selective binding to different integrins may be relevant to the pathology in a number of red blood cell associated diseases. Lastly, ICAM-5, expressed on telencephalic neurons, binds CD11a/CD18 and thus may act as an adhesion molecule for leukocyte binding in the central nervous system.

Synonyms:	ICAM-5; ICAM5; Intercellular adhesion molecule 5; Telencephalin; TLCN; TLN
Note:	For research use only, not for use in diagnostic procedure.
