

Product datasheet for TA392505S

cIAP1 (BIRC2) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB: 1:2000~1:5000

Reactivity: Human

Host: Rabbit

Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to Human c-IAP1.

Specificity: c-IAP1 polyclonal antibody detects endogenous levels of c-IAP1 protein. **Formulation:** Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2.

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 62 kDa

Gene Name: baculoviral IAP repeat containing 2

Database Link: Entrez Gene 329 Human

Q13490

Background: The inhibitor of apoptosis protein (IAP) family consists of an evolutionarily conserved group

of apoptosis inhibitors containing a conserved 70 amino acid BIR (baculovirus inhibitor repeat) domain. Human members of this family include c-IAP1, c-IAP2, XIAP, survivin, livin, and NAIP. Overexpression of IAP family members, particularly survivin and livin, in cancer cell

lines and primary tumors suggests an important role for these proteins in cancer

progression. In general, the IAP proteins function through direct interactions to inhibit the activity of several caspases, including caspase-3, caspase-7, and caspase-9. In addition, binding of IAP family members to the mitochondrial protein Smac blocks their interaction

with caspase-9, thereby allowing the processing and activation of the caspase.
