

Product datasheet for TA392599

JAK2 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, WB

Recommended Dilution: WB:1:2000~1:5000 IF: 1:50~1:200

Reactivity: Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Recombinant protein.

Specificity: JAK2 polyclonal antibody detects endogenous levels of JAK2 protein.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 130 kDa

Gene Name: Janus kinase 2

Database Link: Entrez Gene 3717 Human

<u>060674</u>

Background: JAK2 (Janus kinase 2) belongs to the emerging family of non-receptor Janus tyrosine kinases,

which regulate a spectrum of cellular functions downstream of activated cytokine receptors in the lympho-hematopoietic system. Immunological stimuli, such as interferons and

in the lympho-hematopoietic system. Immunological stimuli, such as interferons and cytokines, induce recruitment of Stat transcription factors to cytokine receptor-associated

JAK2. JAK2 then phosphorylates proximal Stat factors, which subsequently dimerize, translocate to the nucleus and bind to cis elements upstream of target gene promoters to regulate transcription. The canonical JAK/Stat pathway is integral to maintaining a normal immune system by stimulating proliferation, differentiation, survival and host resistance to

pathogens. Altering JAK/Stat signaling to reduce cytokine induced pro-inflammatory

responses represents an attractive target for anti-inflammatory therapies.
