# Product datasheet for TA392618

# c-Jun (JUN) Rabbit Polyclonal Antibody

# **Product data:**

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	WB: 1:500~1:1000
Reactivity:	Human
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to Human c-Jun.
Specificity:	c-Jun (Ab-91) polyclonal antibody detects endogenous levels of c-Jun protein.
Formulation:	Rabbit lgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2
Concentration:	1mg/ml
Conjugation:	Unconjugated
Storage:	Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.
Stability:	1 year
Predicted Protein Size:	~ 42 kDa
Gene Name:	Jun proto-oncogene, AP-1 transcription factor subunit
Database Link:	<u>Entrez Gene 3725 Human</u> <u>P05412</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** c-Jun (JUN) Rabbit Polyclonal Antibody – TA392618

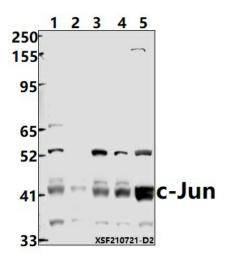

Background:c-Jun is a member of the Jun family containing c-Jun, JunB, and JunD, and is a component of<br/>the transcription factor activator protein-1 (AP-1). AP-1 is composed of dimers of Fos, Jun, and<br/>ATF family members and binds to and activates transcription at TRE/AP-1 elements.<br/>Extracellular signals including growth factors, chemokines, and stress activate AP-1-<br/>dependent transcription. The transcriptional activity of c-Jun is regulated by phosphorylation<br/>at Ser63 and Ser73 through SAPK/JNK. Knockout studies in mice have shown that c-Jun is<br/>essential for embryogenesis, and subsequent studies have demonstrated roles for c-Jun in<br/>various tissues and developmental processes including axon regeneration, liver regeneration,<br/>and T cell development. AP-1 regulated genes exert diverse biological functions including cell<br/>proliferation, differentiation, and apoptosis, as well as transformation, invasion and<br/>metastasis, depending on cell type and context. Other target genes regulate survival, as well<br/>as hypoxia and angiogenesis. Research studies have implicated c-Jun as a promising<br/>therapeutic target for cancer, vascular remodeling, acute inflammation, and rheumatoid<br/>arthritis.

Synonyms:Activator protein 1; AP1; JUN; p39; Proto-oncogene c-Jun; Transcription factor AP-1; V-jun<br/>avian sarcoma virus 17 oncogene homolog

#### Note:

For research use only, not for use in diagnostic procedure.
