

Product datasheet for TA392645S

Nucleophosmin (NPM1) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: WB Recommended Dilution: WB: 1:500~1:1000 **Reactivity:** Human, Mouse, Rat Host: Rabbit Isotype: lgG **Clonality:** Polyclonal Synthetic phosphopeptide derived from human NPM around the phosphorylation site of Immunogen: Threonine 199. Specificity: p-NPM (T199) polyclonal antibody detects endogenous levels of NPM protein only when phosphorylated at Thr199. Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2 **Concentration:** 1mg/ml **Conjugation:** Unconjugated Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles. Storage: Stability: 1 year **Predicted Protein Size:** ~ 38 kDa Gene Name: nucleophosmin (nucleolar phosphoprotein B23, numatrin) Database Link: Entrez Gene 4869 Human P06748 Background: Nucleophosmin (NPM; also known as B23, numatrin or NO38) is an abundant phosphoprotein primarily found in nucleoli. It has been implicated in several distinct cellular functions, including assembly and transport of ribosomes, cytoplasmic/nuclear trafficking, regulation of DNA polymerase α activity, centrosome duplication and molecular chaperoning activities. The NPM gene is also known for its fusion with the anaplastic lymphoma kinase (ALK) receptor tyrosine kinase. The NPM portion contributes to transformation by providing a dimerization domain, which results in activation of the fused kinase.
