

Product datasheet for TA392681M

HSP70-1A (HSPA1A) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: WB Recommended Dilution: WB: 1:500~1:1000 **Reactivity:** Human, Mouse, Rat Rabbit Host: Isotype: lgG Polyclonal **Clonality:** Immunogen: Synthetic phosphopeptide derived from human HSP70 around the phosphorylation site of Tyrosine 41. Specificity: p-HSP70 (Y41) polyclonal antibody detects endogenous levels of HSP70 protein only when phosphorylated at Tyr41. Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2 **Concentration:** 1mg/ml **Conjugation:** Unconjugated Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles. Storage: Stability: 1 year ~ 70 kDa **Predicted Protein Size:** Gene Name: heat shock protein family A (Hsp70) member 1A Database Link: Entrez Gene 3303 Human P08107

Serigene HSP70-1A (HSPA1A) Rabbit Polyclonal Antibody – TA392681M

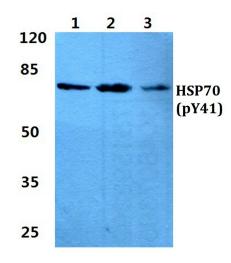

Background:The HSP 70 family is composed of four highly conserved proteins: HSP 70, HSC 70, GRP 75
and GRP 78. These proteins serve a variety of roles: they act as molecular chaperones
facilitating the assembly of multi-protein complexes, participate in the translocation of
polypeptides across cell membranes and to the nucleus and aid in the proper folding of
nascent polypeptide chains. All members of the family, except HSP 70, are constitutively
expressed in primate cells. HSP 70 expression is strongly induced in response to heat stress.
HSP 70 and HSC 70 play key roles in the cytosolic endoplasmic reticulum and mitochondrial
import machinery and are found in both the cytosol and nucleus of mammalian cells. Both
HSP 70 and HSC 70 are involved in the chaperoning of nascent polypeptide chains and in
protecting cells against the accumulation of improperly folded proteins. GRP 78 is localized in
the endoplasmic reticulum, where it receives imported secretory proteins and is involved in
the folding and translocation of nascent peptide chains. It has been postulated that
members of the HSP 70 family act as force-generating motors, relying on the hydrolysis of
ATP for their activity.

Synonyms:Heat shock 70 kDa protein 1/2; Heat shock 70 kDa protein 1A/1B; HSP-70; HSP 70; HSP70-
1/HSP70-2; HSP70.1/HSP70.2; HSPA1; HSPA1A; HSPA1B; HSX70

For research use only, not for use in diagnostic procedure.
