

## **Product datasheet for TA392705**

## 110ddet datasiieet ioi 1733270

## **Rabbit Polyclonal Antibody**

**Product data:** 

**Product Type:** Primary Antibodies

Applications: WB

Recommended Dilution: WB: 1:500~1:1000

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen:Synthetic peptide, corresponding to amino acids 1000-1200 of CRISPR/Cas9.Specificity:CRISPR/Cas9 (D1100) polyclonal antibody detects recombinant Cas9 protein.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

**Storage:** Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

**Predicted Protein Size:** ~ 158,180 kDa

Database Link: Q99ZW2

**Background:** CRISPR (clustered regularly interspaced short palindromic repeat) is an adaptive immune

system that provides protection against mobile genetic elements (viruses, transposable

elements and conjugative plasmids). CRISPR clusters contain spacers, sequences

complementary to antecedent mobile elements, and target invading nucleic acids. CRISPR clusters are transcribed and processed into CRISPR RNA (crRNA) (Probable). In type II CRISPR systems correct processing of pre-crRNA requires a trans-encoded small RNA (tracrRNA), endogenous ribonuclease 3 (rnc) and this protein. The tracrRNA serves as a guide for ribonuclease 3-aided processing of pre-crRNA. Subsequently Cas9/crRNA/tracrRNA

endonucleolytically cleaves linear or circular dsDNA target complementary to the spacer. The target strand not complementary to crRNA is first cut endonucleolytically, then trimmed by 3'-5' exonucleolytically. DNA-binding requires protein and both RNA species. Cas9 probably recognizes a short motif in the CRISPR repeat sequences (the PAM or protospacer adjacent

motif) to help distinguish self versus nonself.
