PTTG1IP Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications:

Recommended Dilution: WB: 1:500~1:1000 IHC: 1:50~1:200

Reactivity: Human Rabbit Host: Isotype: lgG

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to amino acids 130-180 of Human PBF. Specificity: PBF (R151) polyclonal antibody detects endogenous levels of PBF protein. Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year **Predicted Protein Size:** ~ 22 kDa

Gene Name: pituitary tumor-transforming 1 interacting protein

Database Link: Entrez Gene 754 Human

P53801

Background: PBF, also known as PTTG1IP (pituitary tumor-transforming 1 interacting protein), is a 180

> amino acid single-pass type I membrane protein that localizes both the cytoplasm and the nucleus and contains a coiled-coil domain. Expressed ubiquitously, PBF interacts with PTTG and is thought to facilitate the nuclear translocation of PTTG, thereby allowing the PTTGdependent transcriptional activation of fibroblast growth factor (FGF). The gene encoding PBF maps to human chromosome 21, which houses approximately 300 genes and comprises nearly 1.5% of the human genome. Chromosome 21-associated disorders include Alzheimer's disease, amyotrophic lateral sclerosis and, most notably, Down syndrome (also known as

trisomy 21).

Synonyms: PBF; PTTG; PTTG-binding factor; PTTG1IP; Pttg1ip; PTTG binding factor

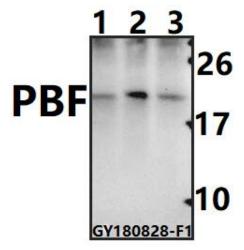

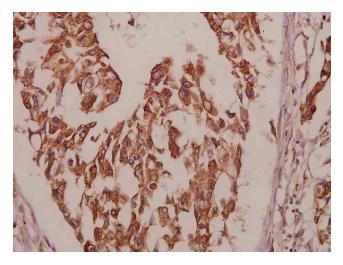

Note:

For research use only, not for use in diagnostic procedure.
