

Product datasheet for TA392779S

PTTG1IP Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WE

Recommended Dilution: WB: 1:500~1:1000 IHC: 1:50~1:200

Reactivity: Human
Host: Rabbit
Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to amino acids 130-180 of Human PBF.

Specificity: PBF (R151) polyclonal antibody detects endogenous levels of PBF protein.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 22 kDa

Gene Name: pituitary tumor-transforming 1 interacting protein

Database Link: Entrez Gene 754 Human

P53801

Background: PBF, also known as PTTG1IP (pituitary tumor-transforming 1 interacting protein), is a 180

amino acid single-pass type I membrane protein that localizes both the cytoplasm and the nucleus and contains a coiled-coil domain. Expressed ubiquitously, PBF interacts with PTTG and is thought to facilitate the nuclear translocation of PTTG, thereby allowing the PTTG-dependent transcriptional activation of fibroblast growth factor (FGF). The gene encoding PBF maps to human chromosome 21, which houses approximately 300 genes and comprises nearly 1.5% of the human genome. Chromosome 21-associated disorders include Alzheimer's disease, amyotrophic lateral sclerosis and, most notably, Down syndrome (also known as

trisomy 21).

Synonyms: PBF; PTTG; PTTG-binding factor; PTTG1IP; Pttg1ip; PTTG binding factor
