Insulin Receptor (INSR) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WE

Recommended Dilution: WB: 1:500~1:1000 IHC: 1:50~1:200

Reactivity: Human
Host: Rabbit
Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic phosphopeptide derived from human Insulin Receptor around the phosphorylation

site of Tyrosine 1355.

Specificity: p-Insulin Receptor (Y1355) polyclonal antibody detects endogenous levels of Insulin Receptor

protein only when phosphorylated at Tyr1355.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 156 kDa

Gene Name: insulin receptor

Database Link: Entrez Gene 3643 Human

P06213

Background: The insulin receptor (IR) is a heterodimeric protein complex that has an intracellular β

subunit and an extracellular α subunit, which is disulfide- linked to a transmembrane segment. The insulin ligand binds to the IR and initiates molecular signaling pathways that promote glucose uptake in cells and glycogen synthesis. Insulin binding to IR induces phosphorylation of intracellular tyrosine kinase domains and recruitment of multiple SH2 and SH3 domain-containing intracellular proteins that serve as signaling intermediates for

pleiotropic effects of insulin.

Synonyms: CD220; INSR; Insulin receptor; IR

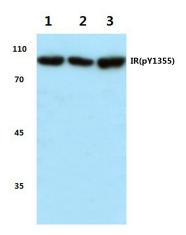

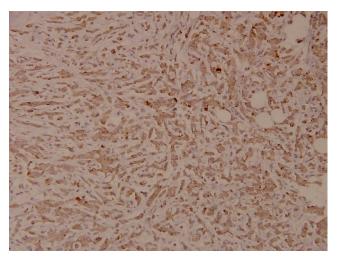

Note:

For research use only, not for use in diagnostic procedure.
