PAK1 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WE

Reactivity: WB: 1:500~1:1000 Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic phosphopeptide derived from human PAKα around the phosphorylation site of

Thr212.

Specificity: PAKα (phospho-T212) polyclonal antibody detects endogenous levels of PAKαprotein only

when phosphorylated at Thr212.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 60 kDa

Gene Name: p21 (RAC1) activated kinase 1

Database Link: Entrez Gene 5058 Human

Q13153

Background: Three isoforms of serine/threonine kinases, designated αPAK p68, βPAK p65 and γPAK p62,

have been shown to exhibit a high degree of sequence homology with the S. cerevisiae kinase Ste 20, involved in pheromone signaling. The α , β and γ PAK isoforms complex specifically with Rac1 and Cdc42 in their active GTP-bound state, inhibiting their intrinsic GTPase activity leading to their autophosphorylation. There are eight sites of autophosphorylation on γ PAK,

including Ser 19, Ser 141 and Thr 402, and phosphorylation of Ser 141 and Thr 402 is correlated with yPAK activation. Once phosphorylated and their affinity for Rac/Cdc42 reduced, the PAK isoforms disassociate from the complex to seek downstream substrates.

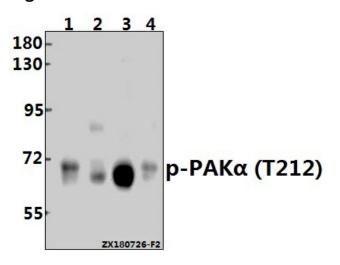

Synonyms: Alpha-PAK; p21-activated kinase 1; p65-PAK; PAK-1; PAKα; Serine/threonine-protein

kinase PAK 1

Note: For research use only, not for use in diagnostic procedure.
