

Product datasheet for TA392943

SSB Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications:

Recommended Dilution: WB: 1:500~1:1000

Reactivity: Human Rabbit Host: Isotype: lgG

Clonality: Polyclonal

Synthetic phosphopeptide derived from human SSB around the phosphorylation site of Immunogen:

Serine 366.

Specificity: p-SSB (S366) polyclonal antibody detects endogenous levels of SSB protein only when

phosphorylated at Serine 366.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year **Predicted Protein Size:** ~ 52 kDa

Gene Name: Sjogren syndrome antigen B Database Link: Entrez Gene 6741 Human

P05455

Background: Ro/SSA is a ribonucleoprotein that binds to autoantibodies in 35 to 50% of patients with SLE

> and in up to 97% of patients with Sjogren syndrome. The Ro/SSA particle consists of a single immunoreactive protein noncovalently bound with one of four small RNA molecules. Most anti-Ro/SSA-positive sera have antibodies not only against the immunoreactive protein, but also against an Ro/SSA protein. The genes which encode the two proteins map to human chromosomes 11p15.5 and 1q31, respectively. La/SSB is an autoimmune RNA-binding

protein that plays a role in the transcription of RNA polymerase III was originally defined by its

reactivity with autoantibodies from patients with Sjogren syndrome and SLE.
