## Tryptophan Hydroxylase (TPH1) Rabbit Polyclonal Antibody

### **Product data:**

**Product Type:** Primary Antibodies

Applications: WE

**Reactivity:** WB: 1:500~1:1000 Human, Mouse, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

**Immunogen:** Synthetic phosphopeptide derived from human TPH1 around the phosphorylation site of

Ser260.

Specificity: TPH1 (phospho-S260) polyclonal antibody detects endogenous levels of TPH1 protein when

phosphorylated at Ser260.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 51 kDa

Gene Name: tryptophan hydroxylase 1

Database Link: Entrez Gene 7166 Human

P17752

Background: Phenylalanine hydroxylase (PAH), tyrosine hydroxylase (TH) and tryptophan hydroxylase

(TPH) comprise a small family of monooxygenases that use tetrahydropterine as a cofactor during the catabolism of aromatic L-amino acids. PAH, TH and TPH all contain catalytic domains with an amino-terminal regulatory domain and a short carboxy-terminal tetramerization domain. Each of these enzymes also contains a single ferrous iron atom, which is bound to two histidines and a glutamate and is likely to be involved in the formation of the hydroxylating intermediate. TPH is the first and rate-limiting step in the biosynthesis of

serotonin in the central nervous system and melatonin in the pineal gland.

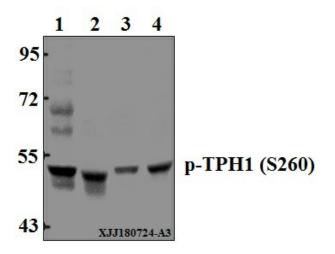

Synonyms: TPH; TPH1; TPRH; Tryptophan 5-hydroxylase 1; Tryptophan 5-monooxygenase 1

**Note:** For research use only, not for use in diagnostic procedure.
