LEF1 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WE

Recommended Dilution: WB: 1:500~1:1000

Reactivity: Human, Rat

Host: Rabbit Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic phosphopeptide derived from human LEF-1 around the phosphorylation site of

Serine 42

Specificity: p-LEF-1 (S42) pAb detects endogenous levels of LEF-1 protein only when phosphorylated at

Ser42.

Formulation: Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 53 kDa

Gene Name: lymphoid enhancer binding factor 1

Database Link: Entrez Gene 51176 Human

Q9UJU2

Background: This gene encodes a transcription factor belonging to a family of proteins that share

homology with the high mobility group protein-1. The protein encoded by this gene can bind to a functionally important site in the T-cell receptor-alpha enhancer, thereby conferring maximal enhancer activity. This transcription factor is involved in the Wnt signaling pathway, and it may function in hair cell differentiation and follicle morphogenesis. Mutations in this gene have been found in somatic sebaceous tumors. This gene has also been linked to other cancers, including androgen-independent prostate cancer. Alternative splicing results in

multiple transcript variants.

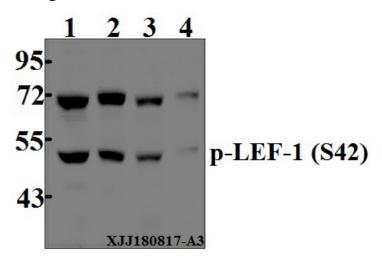

Synonyms: LEF-1; TCF1ALPHA; TCF7L3; TCF10

Note: For research use only, not for use in diagnostic procedure.
