

Product datasheet for TA392969M

Product datasifeet for TAS92909W

CD161 (KLRB1) Mouse Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WB

Recommended Dilution: WB: 1:500~1:2000 IHC: 1:50~1:200

Reactivity: Rat

Host: Mouse

Isotype: IgG

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to amino acids of Human CD161.

Specificity: CD161 (3F8) mAb detects endogenous levels of CD161 protein.

Formulation: 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.2

Concentration: 1mg/ml

Conjugation: Unconjugated

Storage: Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

Stability: 1 year

Predicted Protein Size: ~ 25 kDa

Gene Name: killer cell lectin like receptor B1

Database Link: Q12918

Background: Natural killer (NK) and T cells express a superfamily of proteins with structural features of C-

type lectins. T cells bearing natural killer receptors (NKRs) such as CD94 and CD161 are present in psoriasis. CD161 mediates NK cell activation and functions as an activating receptor. CD161 is a prototypic marker of NK cells, although it is also found on a subset of CD8+ T cells. The expression of NK receptors on CD8+ T cells can be considered a marker of cytotoxic effector T cells that are expanded in vivo after antigenic activation leading to extensive proliferation. The transcription, mRNA accumulation, and surface expression of CD161, a molecule involved in triggering cytotoxicity, is specifically upregulated by IL-12.

Synonyms: C-type lectin domain family 5 member B; CD161; HNKR-P1a; Killer cell lectin-like receptor

subfamily B member 1; Natural killer cell surface protein P1A; NKR-P1A
