

# Product datasheet for TA396657S

## **Goat Polyclonal Antibody**

### **Product data:**

#### **Product Type: Primary Antibodies Applications:** IF, WB Recommended Dilution: WB: >1:10.000 **IF**: 1:500 - 1:2,500 FLISA: >1:20,000 Host: Goat **Clonality:** Polyclonal Immunogen: Glutathione-S-Transferase (Schistosoma japonicum) Specificity: This product is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-fluorescein, anti-Goat Serum, and purified and partially purified Glutathione-S-Transferase (Schistosoma japonicum). Formulation: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 **Concentration:** 1.0 mg/mL - lot specific **Conjugation:** FITC Store vial at -20° C or below prior to opening. This vial contains a relatively low volume of Storage: reagent (25 µL). To minimize loss of volume dilute 1:10 by adding 225 µL of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below. Store the vial at -20°C or below after dilution. Avoid cycles of freezing and thawing. Stability: Expiration date is one (1) year from date of receipt.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Goat Polyclonal Antibody – TA396657S
Background:	Rockland produces a wide range of GST antibodies in our laboratories. Select GST antibodies from several monoclonal and/or polyclonal GST antibodies listed below. Select appropriate GST antibodies for your research by isotype, epitope, applications and species reactivity. GST (Glutathione-S-Transferase) is a protein expression tag commonly used in molecular biology. Anti-GST will react with synthetic construct present in most known GST containing cloning or expression vectors. GST is responsible for the conjugation of reduced glutathione to a wide number of exogenous and endogenous hydrophobic electrophiles. The amino acid sequence GST is highly conserved in most organisms including mammals. GST exists as a 26 kDa homodimer.
Synonyms:	goat anti-GST Antibody FITC Conjugation, Fluorescein Conjugated goat anti-GST Antibody, GST, Glutathione-S-Transferase, FITC
Note:	Anti-Glutathione-S-Transferase has been tested by dot blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
