| Product Type: | Primary Antibodies |
|-----------------------|--|
| Clone Name: | 9G6 |
| Applications: | ELISA, IHC, WB |
| Recommended Dilution: | WB: 1:1,000-1:3,000 IHC: 1.25-2.5 μg/mL ELISA: 1:400,000 |
| Reactivity: | Human, Mouse, Rat |
| Host: | Mouse |
| lsotype: | IgG1, kappa |
| Clonality: | Monoclonal |
| Immunogen: | Anti-Pdcd4 phospho S457 Antibody was produced by repeated immunizations with a synthetic peptide corresponding to residues surrounding Ser457 of the human Pdcd4 protein. |
| Specificity: | Pdcd4 phospho S457 Antibody was purified from concentrated tissue culture supernate by Protein A chromatography. This antibody is specific for human Pdcd4 protein phosphorylated at Ser457. A BLAST analysis was used to suggest cross-reactivity with Pdcd4 from human, mouse, rat and Xenopus based on 100% homology with the immunizing sequence. Cross- reactivity with Pdcd4 from other sources has not been determined. |
| Formulation: | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 |
| Concentration: | 1.0 mg/mL - lot specific |
| Conjugation: | Unconjugated |
| Storage: | Store Pdcd4 phospho S457 Antibody at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. |
| Stability: | Expiration date is one (1) year from date of receipt. |
| Gene Name: | programmed cell death 4 (neoplastic transformation inhibitor) |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | PDCD4 Mouse Monoclonal Antibody [Clone ID: 9G6] – TA396762 |
|----------------|--|
| Database Link: | <u>Entrez Gene 27250 Human</u> <u>Q53EL6</u> |
| Background: | Programmed cell death 4 (Pdcd4) is a novel tumor suppressor. Pdcd4 directly inhibits the helicase activity of eukaryotic translation initiation factor 4A (eIF4A), a component of the translation initiation complex. Pdcd4 also suppresses the transactivation of activator protein-1 (AP-1)-responsive promoters by c-Jun. Pdcd4 contains two Akt phosphoryl-ation sites, one at Ser67 and the other at Ser457. The phosphorylation of Pdcd4 by Akt causes nuclear translocation of Pdcd4 and a significant decrease in the ability of Pdcd4 to interfere with the transactivation of AP-1-responsive promoters by c-Jun. Ideal for researchers involved in Cell Signaling, Cancer and Signal Transduction research. |
| Synonyms: | mouse anti-Pdcd4 pS457 Antibody, Death up-regulated gene protein antibody, Dug antibody, H731 antibody, Ma3 antibody, Neoplastic transformation inhibitor antibody, Neoplastic transformation inhibitor protein antibody, Nuclear antigen H731 antibody |
| Note: | Anti-PDCD4 pS457 monoclonal antibody has been tested by ELISA and western blotting and is suitable for immunohistochemistry. Specific conditions for reactivity should be optimized by the end user. Expect a band approximately 62 kDa in size corresponding to phosphorylated Pdcd4 protein by western blotting in the appropriate cell lysate or extract. This phospho- specific monoclonal antibody reacts with human Pdcd4 pS457 and shows minimal reactivity by ELISA against the non-phosphorylated form of the immunizing peptide. |
