Product datasheet for TA396807

CALCA Monoclonal Antibody [Clone ID: 8B5.A3.D5.D3.G6.E7]

Product data:

Product Type:	Primary Antibodies
Clone Name:	8B5.A3.D5.D3.G6.E7
Applications:	ELISA, WB
Recommended Dilution:	WB : 1:1,000 - 1:2,000 ELISA : User Optimized
Reactivity:	Human
lsotype:	lgG1, lambda
Clonality:	Monoclonal
Immunogen:	Procalcitonin Antibody was produced in mice prepared by repeated immunizations with full- length recombinant human Procalcitonin protein.
Specificity:	Anti-Procalcitonin Antibody was purified from concentrated tissue culture supernate by Protein A chromatography. This antibody is specific for human Procalcitonin. Cross-reactivity with Procalcitonin from other sources has not been determined.
Formulation:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Concentration:	1.0 mg/ml - lot specific
Conjugation:	Unconjugated
Storage:	Store vial at -20° C prior to opening. Aliquot contents and freeze at -20° C or below for extended storage. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Stability:	Expiration date is one (1) year from date of receipt.
Database Link:	<u>P06881</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

mainly produced by the C cells of the thyroid and certain endocrine cells of the lung. Unconstruction on the expression conditions, procalcitonin is immediately cleaved into three specific fragments, a N terminal residue, calcitonin and katacalcin. Levels of unprocessed procalcitonin rise significantly after bacterial infection, trauma or shock. This gene encod the peptide hormones calcitonin, calcitonin gene-related peptide and katacalcin by tissue specific alternative RNA splicing of the gene transcripts and cleavage of inactive precursor proteins. Calcitonin is involved in calcium regulation and acts to regulate phosphorus metabolism. Calcitonin gene-related peptide functions as a vasodilator while katacalcin is calcium-lowering peptide. Multiple transcript variants encoding different isoforms have be found for this gene.		CALCA Monoclonal Antibody [Clone ID: 8B5.A3.D5.D3.G6.E7] – TA396807
polypeptide alpha, CT, KC, CGRP, CALC1, CGRP1, CGRP-INote:Anti-Procalcitonin [8B5.A3] antibody was tested by ELISA and Western Blot. Specific	Background:	fragments, a N terminal residue, calcitonin and katacalcin. Levels of unprocessed procalcitonin rise significantly after bacterial infection, trauma or shock. Western Blot of Mouse Anti-Procalcitonin antibody. Lane 1: MW. Lane 2: Procalcitonin Protein. Load: 5 µg per lane. Primary antibody: Procalcitonin antibody at NEAT overnight at 4°C. Secondary antibody: HRP Mouse IgG secondary antibody at 1:40,000 for 30 min at RT. Block: MB-070 overnight at 4°C. Predicted/Observed size: 13.9 kDa.
