## MAPK1 Mouse Monoclonal Antibody [Clone ID: 3H9.A1.A8]

### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: 3H9.A1.A8

Applications: ELISA, WB

Recommended Dilution: WB: 1µg/mL

**ELISA**: 1:40,000

Reactivity: Human, Mouse, Rat

**Host:** Mouse

Clonality: Monoclonal

Immunogen: Anti-ERK2 Monoclonal Antibody was produced in mice by repeated immunizations with

synthetic peptide corresponding to amino acid residues near an internal region of ERK2

conjugated to KLH.

**Specificity:** This Fluorescein conjugated protein A purified mouse monoclonal antibody reacts specifically

with human ERK2. Anti-ERK2 is purified from tissue culture supernatant by protein A purification. Cross reactivity is expected to occur with human, mouse, and rat based on sequence identity of the peptide immunogen. This antibody does not react with the ERK1

isoform.

**Formulation:** 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

**Reconstitution Method:** Restore with deionized water (or equivalent) - Reconstitution Volume: 100 μL

**Concentration:** 1mg/mL - lot specific

Conjugation: FITC

Storage: Store vial at -20° C or below prior to opening. This vial contains a relatively low volume of

reagent (25  $\mu$ L). To minimize loss of volume dilute 1:10 by adding 225  $\mu$ L of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below. Store the vial at -20°C or below after dilution. Avoid cycles of freezing

and thawing.

**Stability:** Expiration date is one (1) year from date of receipt.

Database Link: P28482

### MAPK1 Mouse Monoclonal Antibody [Clone ID: 3H9.A1.A8] - TA396826

**Background:** ERK2 antibodies detect the ERK2 isoform. Mitogen activated protein kinase 1, also known as

MAPK1, ERK, or ERK2, is an integral component of the MAP kinase cascade that regulates cell growth and differentiation. ERK1 and ERK2 are activated by MEK1 and MEK2 in the B-raf signaling pathway resulting in its translocation to the nucleus where it phosphorylates nuclear

targets. Human ERK1 and ERK2 are 84% identical in sequence and share common

functionality in cells. Anti-ERK2 antibody is ideal for investigators involved in Neuroscience,

Cell Signaling and Cancer Research.

**Synonyms:** mouse anti-ERK2 antibody FITC conjugation, fluorescein conjugated mouse anti-ERK2

antibody, MAPK1, ERK, ERK-2, ERK2, MAPK2, P42MAPK, PRKM1, PRKM2, ERK-2 Antibody

**Note:** Anti-ERK 2 (MOUSE) FITC conjugated antibody is suitable for use in ELISA and Western

Blotting. Specific conditions of reactivity should be optimized by the end user. Expect a band

of approximately 41 kDa.
