## MAP2K2 Mouse Monoclonal Antibody [Clone ID: 19G10.F1.E2]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: 19G10.F1.E2
Applications: ELISA, WB

Recommended Dilution: WB: 1µg/mL

**ELISA**: 1:40,000

Reactivity: Human, Mouse, Rat

**Host:** Mouse

Isotype: IgG2b, kappa
Clonality: Monoclonal

Immunogen: Anti-MEK2 Monoclonal Antibody was produced in mice by repeated immunizations with

synthetic peptide corresponding to amino acid residues near the N-terminus conjugated to

KLH.

**Specificity:** This biotin conjugated protein A purified mouse monoclonal antibody reacts specifically with

human MEK2. Anti-MEK2 is purified from tissue culture supernatant by protein A purification. Cross reactivity is expected to occur with human, mouse, and rat based on sequence identity

of the peptide immunogen. This antibody does not react with the MEK1 isoform.

**Formulation:** 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

**Concentration:** 1.0 mg/mL - lot specific

Conjugation: Unconjugated

Storage: Store vial at -20° C or below prior to opening. This vial contains a relatively low volume of

reagent (25  $\mu$ L). To minimize loss of volume dilute 1:10 by adding 225  $\mu$ L of the buffer stated above directly to the vial. Recap, mix thoroughly and briefly centrifuge to collect the volume at the bottom of the vial. Use this intermediate dilution when calculating final dilutions as recommended below. Store the vial at -20°C or below after dilution. Avoid cycles of freezing

and thawing.

**Stability:** Expiration date is one (1) year from date of receipt.

Database Link: P36507

Background:

MEK2 antibodies detect the MEK2 isoform. Mitogen-activated protein kinase kinase 2, also known as MEK2 or MKK2, is an integral component of the MAP kinase cascade that regulates cell growth and differentiation. This pathway also plays a key role in synaptic plasticity in the brain. Activated MEK 2 acts as a dual specificity kinase phosphorylating both a threonine and a tyrosine residue on MAP kinase. MEK1 and MEK2 are about 80% identical to each other, and nearly identical within the kinase domain. The MEK2 antibody is ideal for investigators involved in Neuroscience, Cell Signaling and Cancer Research.

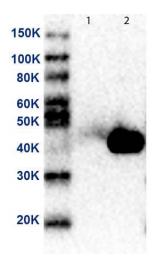

Synonyms:

mouse anti-MEK2 Antibody biotin conjugation, biotin conjugated mouse anti-MEK2 Antibody, MAP2K2, MEK, MEK 2, MKK2, PRKMK2, CFC4, MEK-2 Antibody

Note:

Anti-MEK 2 Biotin Conjugated (MOUSE) Antibody is suitable for use in Western Blotting and ELISA. Specific conditions of reactivity should be optimized by the end user. Expect a band of approximately 44 kDa.

#### **Product images:**

Western Blot of Anti-MEK2 Antibody. Lane 1: MEK-1 recombinant protein. Lane 2: MEK-2 recombinant protein. Load: 50ng per lane. Primary Antibody: Anti-MEK2 supernatant clone neat over night at 4°C. Secondary Antibody: Antimouse HRP at 1:40,000 dilution.
