

## Product datasheet for **TA397794**

### Human IgG (H&L) Antibody Alkaline Phosphatase Conjugated Pre-Adsorbed

#### Product data:

Product Type:	Secondary Antibodies
Product Name:	Human IgG (H&L) Antibody Alkaline Phosphatase Conjugated Pre-Adsorbed
Applications:	ELISA, IHC, WB
Recommended Dilution:	<b>WB:</b> 1:500 - 1:2,500 <b>IHC:</b> 1:200 - 1:1,000 <b>ELISA:</b> 1:2,000 - 1:10,000
Host:	Donkey
Immunogen:	Human IgG whole molecule
Formulation:	0.05 M Tris Chloride, 0.15M Sodium Chloride, 0.001 M Magnesium Chloride, 0.0001M Zinc Chloride, 50% (v/v) Glycerol; pH 8.0
Concentration:	1.0 mg/mL - lot specific
Conjugation:	Alkaline Phosphatase
Storage:	Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates will result in a substantial loss of enzymatic activity.
Note:	Anti-Human IgG Alkaline Phosphatase conjugate has been tested by ELISA and is suitable for immunoblotting (western or dot blot), ELISA, immunoelectron microscopy and immunohistochemistry as well as other antibody-based enzymatic assays requiring lot-to-lot consistency.

ELISA results of Purified Donkey Anti-Human IgG MinX10 Antibody Alkaline Phosphatase Conjugated tested against purified Human IgG mx10. Each well was coated in duplicate with 10µg of Human IgG (p/n 009-0102). The working dilution of Anti-Human IgG mx10 Alkaline Phosphatase Antibody is 1:34,000. The starting dilution of antibody was 5µg/ml and the X-axis represents the Log10 of a 3-fold dilution. This titration is a 4-parameter curve fit where the IC50 is defined as the titer of the antibody. Assay performed using 3% Fish Gel Blocking buffer (p/n MB-066) and NPP Substrate (p/n NPP-100).
