F(ab')2 Golden Syrian Hamster IgG (H&L) Antibody Phycoerythrin Conjugated

Product data:

Product Type: Secondary Antibodies

Product Name: F(ab')2 Golden Syrian Hamster IgG (H&L) Antibody Phycoerythrin Conjugated

Applications: FC, IF

Recommended Dilution: IF: 1:100 - 1:250

FC: 1:100 - 1:250

Reactivity: Hamster
Host: Rabbit

Immunogen: Anti-Golden Syrian Hamster IgG (H&L) was produced by repeated immunization with Golden

Syrian Hamster IgG whole molecule in rabbit.

Formulation: 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2

Reconstitution Method: Restore with deionized water (or equivalent) - Reconstitution Volume: 1.0 mL

Concentration: 0.5 mg/mL - lot specific

Conjugation: Phycoerythrin

Storage: Store vial at 4° C prior to restoration. Restore with deionized water (or equivalent). This

product is stable at 4° C as an undiluted liquid. Dilute only prior to immediate use. Centrifuge product if not completely clear after standing at room temperature. Do not freeze after reconstitution. Store reagent in the dark. Use subdued lighting during handling and

incubation of cells prior to analysis.

Note: Golden Syrian Hamster IgG (H&L) Antibody is suitable for immunomicroscopy and flow

cytometry or FACS analysis as well as other antibody based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. The maximum amount of reagent required to stain 1 x 10E6 cells in flow cytometry is approximately 1.0 μ g of antibody conjugate. Lesser amounts of reagent may be sufficient for staining. Optimal titers for other applications should be determined by the researcher. As a general guideline dilutions of 1:100 to 1:250 should be suitable for most

applications.
