

## Product datasheet for **TA399815**

### KRT8 Mouse Monoclonal Antibody [Clone ID: TS1]

#### Product data:

Product Type:	Primary Antibodies
Clone Name:	TS1
Applications:	ELISA, IHC, IP, WB
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1, kappa
Clonality:	Monoclonal
Immunogen:	The original antibody was generated by immunizing BALB/c mice with purified human gastrointestinal tumor derived cytokeratin.
Specificity:	<p>This antibody binds a discontinuous epitope on helical 2B domain of the human cytokeratin 8 between amino acid residues 340–365 (QRGELAIKDANAKLSELEAALQRAKQ). Cytokeratins are intermediate filaments found in the intracytoplasmic cytoskeleton of epithelial tissue. Together with KRT19, cytokeratin 8 helps to link the contractile apparatus to dystrophin at the costameres of striated muscle. Cytokeratin 8 is a serological tumor marker</p> <p>This antibody has specific reactivity for human cytokeratin 8. The binding characterization and epitope mapping of this antibody was done using ELISA (PMID: 9486565; 9892182). This antibody was also capable of immunoprecipitating human cytokeratin 8 from a sample. This antibody can be used in the identification of cytokeratin 8 in a western blot assay. This antibody was also used in the immunohistochemical staining of frozen sections of normal human adult tissues like skin, esophagus and liver (PMID: 2479674). This antibody is capable of binding cytokeratin 8 expressed on carcinomas in vivo. This antibody was used for the radio immunolocalization of cytokeratin 8 and radioimmunotherapy (PMID: 9892182; 7493362; 9406704).</p>
Formulation:	PBS with 0.02% Proclin 300.
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.
Database Link:	<a href="#">P05787</a>
