

Product datasheet for **TA399826**

MSH2 Mouse Monoclonal Antibody [Clone ID: 1B11-14-16]

Product data:

Product Type:	Primary Antibodies
Clone Name:	1B11-14-16
Applications:	ELISA, IHC, WB
Reactivity:	Human
Host:	Mouse
Isotype:	IgG2b, kappa
Clonality:	Monoclonal
Immunogen:	The original antibody was generated by immunizing BALB/c mice with human MSH2 protein peptide (KLH-NSFVNEIISRIKVTT-Cys) conjugated with KLH in equal volume of Freund's complete adjuvant.
Specificity:	<p>This antibody binds an epitope on the human DNA mismatch protein MSH2 between amino acids 919-934 (NSFVNEIISRIKVTT). MSH2 forms a heterodimer with MSH6 to make the human MutSα mismatch repair complex. The DNA mismatch repair system (MMR) is composed of enzyme molecules that specifically repair DNA base mismatches. MSH2 is involved in many different forms of DNA repair, including transcription-coupled repair, homologous recombination, and base excision repair. Studies have shown that mutations and/or loss of function of MMR genes are related to the occurrence of a variety of tumors, such as colorectal cancer, skin cancer, ovarian cancer, and endometrial cancer.</p> <p>The binding specificity of this antibody for human MSH2 was determined using ELISA. This antibody was capable of detecting MSH2 from HCT8 and Biu-87 cell lysates in a western blot. This antibody was also used in the immunohistochemical analysis of normal tissues like tonsil, appendix tissues and cancerous tissues like colorectal and bladder cancer. This antibody shows similar staining of MSH2 protein compared to the commercially available antibody G219-1129 (CN110218251).</p>
Formulation:	PBS with 0.02% Proclin 300.
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.
