## FCGRT Mouse Monoclonal Antibody [Clone ID: h22-0015]

## **Product data:**

**Product Type:** Primary Antibodies

Clone Name: h22-0015

Applications: Bl

Reactivity: Human Host: Mouse

Isotype: IgG1, kappa
Clonality: Monoclonal

**Immunogen:** The original antibody was generated by immunizing Balb/c mice with recombinant FcRn.

**Specificity:** The antibody is specific for human FcRn. The neonatal Fc receptor is a cell surface receptor

that transfers passive humoral immunity from the mother to the newborn.

The antibody was employed in blocking experiments with HEK293 cells that overexpress FcRn. The results showed that the antibody has a good effect of blocking the binding of IgG to FcRn at the cellular level (IC50: 11.4nM). The effect of the antibody was tested in human FcRn transgenic mice. The antibody was able to increase IgG catabolism in vivo by blocking FcRn

binding (CN113484526).

**Formulation:** PBS with 0.02% Proclin 300.

Concentration: lot specific

Conjugation: Unconjugated

Storage: Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

Database Link: P55899

Synonyms: FCGRT; IgG Fc fragment receptor transporter alpha chain; IgG receptor FcRn large subunit

p51; Neonatal Fc receptor
