

## **Product datasheet for TA400005**

# **BCL10 Mouse Monoclonal Antibody [Clone ID: OTI6A4]**

### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI6A4

Applications: FC

Recommended Dilution: FC 1:50
Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human BCL10 (NP\_003912) produced in HEK293T

cell

**Formulation:** PBS (pH7.4) containing 0.02% NaN3; store at 4C, do not freeze

**Concentration:** 0.5 mg/ml

**Purification:** Purified from mouse ascites fluids by affinity chromatography

Conjugation: PE

Storage: Store at 4°C.

**Stability:** Stable for 12 months from date of receipt.

Predicted Protein Size: 26.1 kDa

**Gene Name:** BCL10 immune signaling adaptor

Database Link: NP 003912

Entrez Gene 8915 Human

O95999

#### Background:

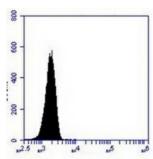

This gene was identified by its translocation in a case of mucosa-associated lymphoid tissue (MALT) lymphoma. The protein encoded by this gene contains a caspase recruitment domain (CARD), and has been shown to induce apoptosis and to activate NF-kappaB. This protein is reported to interact with other CARD domain containing proteins including CARD9, 10, 11 and 14, which are thought to function as upstream regulators in NF-kappaB signaling. This protein is found to form a complex with MALT1, a protein encoded by another gene known to be translocated in MALT lymphoma. MALT1 and this protein are thought to synergize in the activation of NF-kappaB, and the deregulation of either of them may contribute to the same pathogenetic process that leads to the malignancy. [provided by RefSeq]

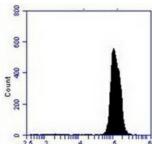

Synonyms: c-E10; CARMEN; CIPER; CLAP; IMD37; mE10

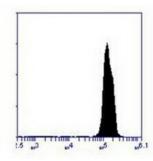

**Protein Families:** Druggable Genome

**Protein Pathways:** B cell receptor signaling pathway, T cell receptor signaling pathway

### **Product images:**

Jurkat T cells are fixed 2% formaldehyde for 20 min, then permeabilized with 0.1% saponin. The cells are then stained with a PE-labeled isotope control antibody, or 4A8 or 6A4 anti-Bcl10 antibodies.
