

# Product datasheet for TA500012M

## FGF2 Mouse Monoclonal Antibody [Clone ID: OTI3D9]

### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI3D9
Applications:	IF, IHC, WB
Recommended Dilution:	WB 1:1000, IHC 1:50, IF 1:100
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 10-155 of human bFGF (NP_001997) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	30.6 kDa
Gene Name:	fibroblast growth factor 2
Database Link:	<u>NP_001997</u> <u>Entrez Gene 14173 MouseEntrez Gene 54250 RatEntrez Gene 2247 Human</u> <u>P09038</u>

	FGF2 Mouse Monoclonal Antibody [Clone ID: OTI3D9] – TA500012M
Background:	BFGF is a member of the fibroblast growth factor (FGF) family. FGF family members bind heparin and possess broad mitogenic and angiogenic activities. This protein has been implicated in diverse biological processes, such as limb and nervous system development, wound healing, and tumor growth. The mRNA for this gene contains multiple polyadenylation sites, and is alternatively translated from non-AUG (CUG) and AUG initiation codons, resulting in five different isoforms with distinct properties. The CUG-initiated isoforms are localized in the nucleus and are responsible for the intracrine effect, whereas, the AUG-initiated form is mostly cytosolic and is responsible for the paracrine and autocrine effects of this FGF.
Synonyms:	BFGF; FGF-2; FGFB; HBGF-2
Protein Families	: Druggable Genome, Secreted Protein
Protein Pathway	<b>vs:</b> MAPK signaling pathway, Melanoma, Pathways in cancer, Regulation of actin cytoskeleton

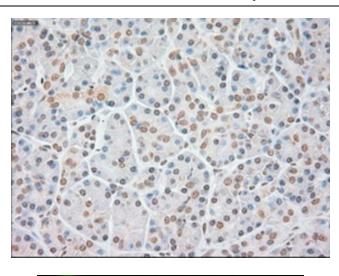

### **Product images:**

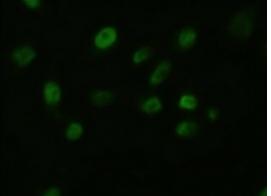

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY BFGF (Cat# [RC217426], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BFGF (Cat# [TA500012]). Positive lysates [LY400733] (100ug) and [LC400733] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (10ug) from 4 different cell lines by using anti-BFGF monoclonal antibody at 1:200 dilution.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US 

Immunohistochemical staining of paraffinembedded Human pancreas tissue within the normal limits using anti-BFGF mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Anti-BFGF mouse monoclonal antibody ([TA500012]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY BFGF ([RC217426]).
