LAT2 (SLC7A8) Mouse Monoclonal Antibody [Clone ID: OTI5A9]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI5A9

Applications: FC, IF, IHC, IP, WB

Recommended Dilution: WB 1:500, IHC 1:50, IF 1:100, FLOW 1:100, IP 2ug/500ul

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full-length protein expressed in 293T cell transfected with human SLC7A8 expression vector .

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 1 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 58.4 kDa

Gene Name: solute carrier family 7 member 8

Database Link: NP 036376

Entrez Gene 23428 Human

Q9UHI5

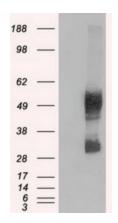

Background:

Sodium-independent, high-affinity transport of small and large neutral amino acids such as alanine, serine, threonine, cysteine, phenylalanine, tyrosine, leucine, arginine and tryptophan, when associated with SLC3A2/4F2hc. Acts as an amino acid exchanger. Has higher affinity for L-phenylalanine than LAT1 but lower affinity for glutamine and serine. L-alanine is transported at physiological concentrations. Plays a role in basolateral (re)absorption of neutral amino acids. Involved in the uptake of methylmercury (MeHg) when administered as the L-cysteine orD,L-homocysteine complexes, and hence plays a role in metal ion homeostasis and toxicity. Involved in the cellular activity of small molecular weight nitrosothiols, via the stereoselective transport of L-nitrosocysteine (L-CNSO) across the transmembrane. Plays an essential role in the reabsorption of neutral amino acids from the epithelial cells to the bloodstream in the kidney.

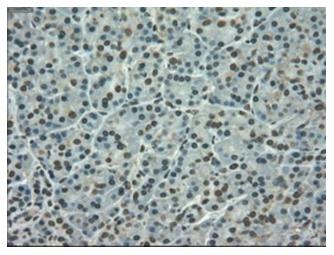

Synonyms: LAT2; LPI-PC1

Protein Families: Druggable Genome, Transmembrane

Product images:

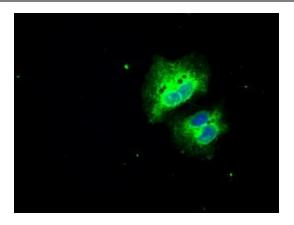

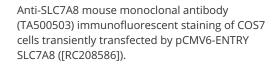

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY SLC7A8 (Cat# [RC208586], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-SLC7A8(Cat# TA500503). Positive lysates [LY402177] (100ug) and [LC402177] (20ug) can be purchased separately from OriGene.

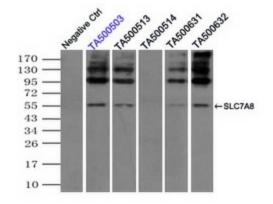

Immunohistochemical staining of paraffinembedded Human pancreas tissue within the normal limits using anti-SLC7A8 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

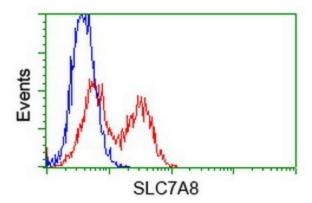

Immunoprecipitation (IP) of SLC7A8 by using TrueMab monoclonal anti-SLC7A8 antibodies (Negative control: IP without adding anti-SLC7A8 antibody.). For each experiment, 500ul of DDK tagged SLC7A8 overexpression lysates (at 1:5 dilution with HEK293T lysate), 2ug of anti-SLC7A8 antibody and 20ul (0.1mg) of goat anti-mouse conjugated magnetic beads were mixed and incubated overnight. After extensive wash to remove any non-specific binding, the immunoprecipitated products were analyzed with rabbit anti-DDK polyclonal antibody.

HEK293T cells transfected with either [RC208586] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-SLC7A8 antibody (TA500503), and then analyzed by flow cytometry.
