HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PLEK ([RC203780], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PLEK. Positive lysates [LY419171] (100ug) and [LC419171] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either pCMV6-ENTRY PLEK ([RC203780]) (Red) or empty vector control plasmid (Blue) were immunostained with anti-PLEK mouse monoclonal (TA500903), and then analyzed by flow cytometry.
