## PSMC3 Mouse Monoclonal Antibody [Clone ID: OTI1C10]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI1C10
Applications: IF, IHC, WB

Recommended Dilution: WB 1:2000, IHC 1:50, IF 1:100

Reactivity: Human, Dog, Rat, Monkey, Mouse

Host: Mouse Isotype: IgG2a

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human PSMC3(NP\_002795) produced in HEK293T

cell

**Formulation:** PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 0.81 mg/ml

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Predicted Protein Size:** 49.2 kDa

**Gene Name:** proteasome 26S subunit, ATPase 3

Database Link: NP 002795

#### Background:

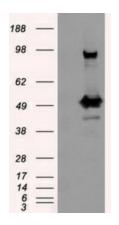

The 26S proteasome is a multicatalytic proteinase complex with a highly ordered structure composed of 2 complexes, a 20S core and a 19S regulator. The 20S core is composed of 4 rings of 28 non-identical subunits; 2 rings are composed of 7 alpha subunits and 2 rings are composed of 7 beta subunits. The 19S regulator is composed of a base, which contains 6 ATPase subunits and 2 non-ATPase subunits, and a lid, which contains up to 10 non-ATPase subunits. Proteasomes are distributed throughout eukaryotic cells at a high concentration and cleave peptides in an ATP/ubiquitin-dependent process in a non-lysosomal pathway. An essential function of a modified proteasome, the immunoproteasome, is the processing of class I MHC peptides. This gene encodes one of the ATPase subunits, a member of the triple-A family of ATPases that have chaperone-like activity. This subunit may compete with PSMC2 for binding to the HIV tat protein to regulate the interaction between the viral protein and the transcription complex. A pseudogene has been identified on chromosome 9.

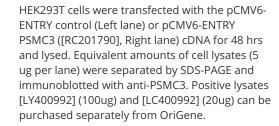

**Synonyms:** DCIDP; RPT5; TBP1

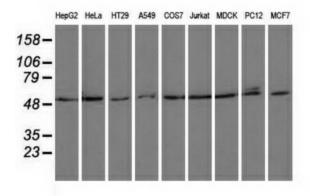

**Protein Families:** Druggable Genome, Transcription Factors

**Protein Pathways:** Proteasome

### **Product images:**

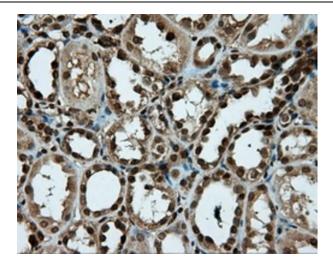

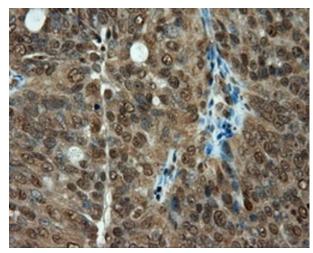

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-PSMC3 monoclonal antibody.

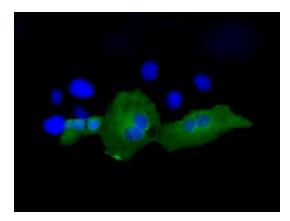

Immunohistochemical staining of paraffinembedded Kidney tissue within the normal limits using anti-PSMC3 mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA500928], Dilution 1:50)

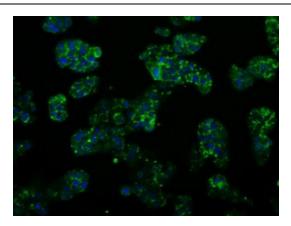

Immunohistochemical staining of paraffinembedded Adenocarcinoma of ovary tissue using anti-PSMC3 mouse monoclonal antibody. (Heatinduced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA500928], Dilution 1:50)

Anti-PSMC3 mouse monoclonal antibody ([TA500928]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY PSMC3 ([RC201790]).

Immunofluorescent staining of HepG2 cells using anti-PSMC3 mouse monoclonal antibody ([TA500928]).
