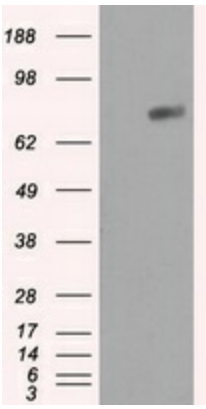
Background: Can activate specifically hydrolysis of GTP bound to RAC1 and CDC42, but not RALA. Mediates ATP-dependent transport of S-(2,4-dinitrophenyl)-glutathione (DNP-SG) and doxorubicin (DOX) and is the major ATP-dependent transporter of glutathione conjugates of electrophiles (GS-E) and DOX in erythrocytes. Can catalyze transport of glutathione conjugates and xenobiotics, and may contribute to the multidrug resistance phenomenon. Serves as a scaffold protein that brings together proteins forming an endocytotic complex during interphase and also with CDC2 to switch off endocytosis, One of its substrates would be EPN1/Epsin

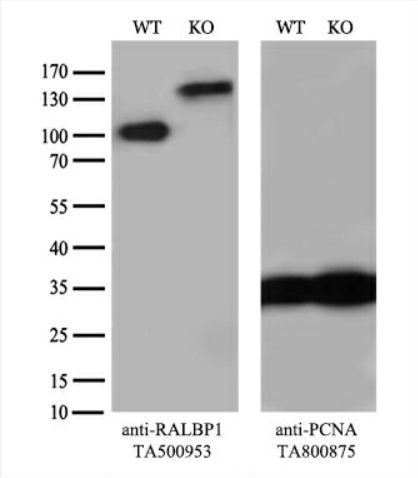
Synonyms: RIP1; RLIP1; RLIP76

Protein Pathways: Pancreatic cancer, Pathways in cancer

Product images:



HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY RALBP1 ([RC201524], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-RALBP1. Positive lysates [LY402031] (100ug) and [LC402031] (20ug) can be purchased separately from OriGene.



Equivalent amounts of cell lysates (10 ug per lane) of wild-type HeLa cells (WT, Cat# LC810HELA) and RALBP1-Knockout HeLa cells (KO, Cat# [LC833874]) were separated by SDS-PAGE and immunoblotted with anti-RALBP1 monoclonal antibody [TA500953] (1:500). Then the blotted membrane was stripped and reprobed with anti-PCNA antibody as a loading control.

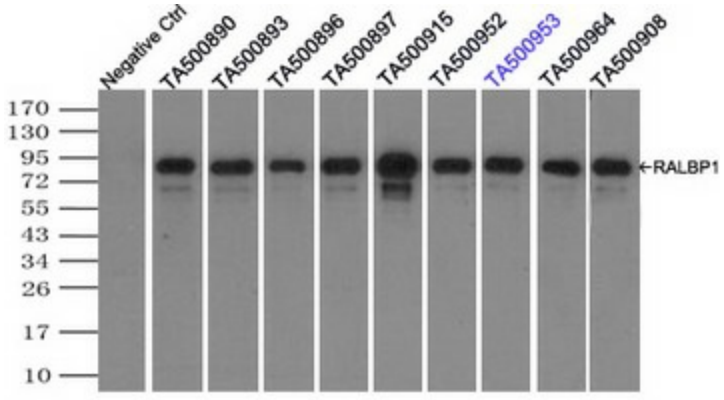
Anti-RALBP1 mouse monoclonal antibody ([TA500953]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY RALBP1 ([RC201524]).



Immunoprecipitation (IP) of RALBP1 by using TrueMab monoclonal anti-RALBP1 antibodies (Negative control: IP without adding anti-RALBP1 antibody.). For each experiment, 500ul of DDK tagged RALBP1 overexpression lysates (at 1:5 dilution with HEK293T lysate), 2ug of anti-RALBP1 antibody and 20ul (0.1mg) of goat anti-mouse conjugated magnetic beads were mixed and incubated overnight. After extensive wash to remove any non-specific binding, the immuno-precipitated products were analyzed with rabbit anti-DDK polyclonal antibody.
