## RhoGDI (ARHGDIA) Mouse Monoclonal Antibody [Clone ID: OTI1A7]

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI1A7

Applications: IF, IHC, WB

Recommended Dilution: WB 1:2000, IHC 1:50, IF 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human ARHGDIA(NP\_004300) produced in

HEK293T cell.

**Formulation:** PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

**Concentration:** 0.72 mg/ml

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Predicted Protein Size:** 23 kDa

**Gene Name:** Rho GDP dissociation inhibitor alpha

Database Link: NP 004300

Entrez Gene 192662 MouseEntrez Gene 360678 RatEntrez Gene 396 Human

P52565

Background: Aplysia Ras-related homologs (ARHs), also called Rho genes, belong to the RAS gene

superfamily encoding small guanine nucleotide exchange (GTP/GDP) factors. The ARH proteins may be kept in the inactive, GDP-bound state by interaction with GDP dissociation

inhibitors, such as ARHGDIA

Synonyms: GDIA1; HEL-S-47e; NPHS8; RHOGDI; RHOGDI-1

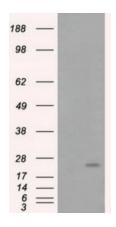

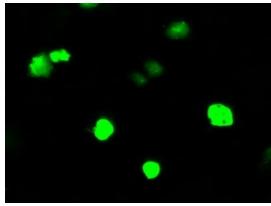

**Protein Families:** Druggable Genome

**Protein Pathways:** Neurotrophin signaling pathway

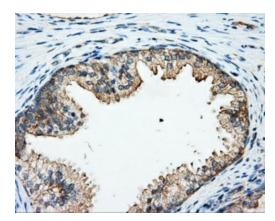

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ARHGDIA ([RC200902], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ARHGDIA. Positive lysates [LY401371] (100ug) and [LC401371] (20ug) can be purchased separately from OriGene.

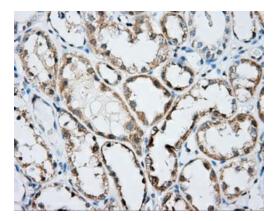

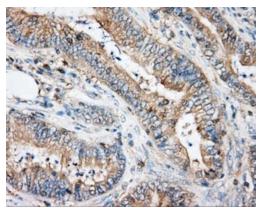

Anti-ARHGDIA mouse monoclonal antibody ([TA501120]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY ARHGDIA ([RC200902]).

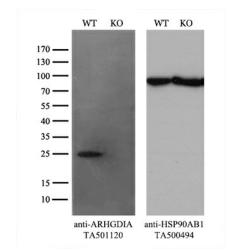

Immunohistochemical staining of paraffinembedded prostate tissue within the normal limits using anti-ARHGDIA mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA501120], Dilution 1:50)

Immunohistochemical staining of paraffinembedded Kidney tissue within the normal limits using anti-ARHGDIA mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA501120], Dilution 1:50)

Immunohistochemical staining of paraffinembedded Adenocarcinoma of colon tissue using anti-ARHGDIA mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA501120], Dilution 1:50)

Equivalent amounts of cell lysates (10 ug per lane) of wild-type 293T cells (WT, Cat# LC810293T) and ARHGDIA-Knockout 293T cells (KO, Cat# [LC811309]) were separated by SDS-PAGE and immunoblotted with anti-ARHGDIA monoclonal antibody [TA501120], (1:200). Then the blotted membrane was stripped and reprobed with anti-HSP90AB1 antibody ([TA500494]) as a loading control.
