# Product datasheet for TA501783S

# alpha 1 Fetoprotein (AFP) Mouse Monoclonal Antibody [Clone ID: OTI1E8]

## **Product data:**

| Product Type:           | Primary Antibodies  |
|-------------------------|---|
| Clone Name:             | OTI1E8  |
| Applications:           | FC, IHC, WB   |
| Recommended Dilution:   | WB 1:500, IHC 1:150, FLOW 1:100   |
| Reactivity:             | Human   |
| Host:                   | Mouse   |
| lsotype:                | lgG1  |
| Clonality:              | Monoclonal  |
| Immunogen:              | Full length human recombinant protein of human AFP (NP_001125) produced in HEK293T cell.                  |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.                                      |
| Concentration:          | 1 mg/ml   |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation:            | Unconjugated  |
| Storage:                | Store at -20°C as received.   |
| Stability:              | Stable for 12 months from date of receipt.  |
| Predicted Protein Size: | 66.3 kDa  |
| Gene Name:              | alpha fetoprotein   |
| Database Link:          | <u>NP_001125</u><br><u>Entrez Gene 174 Human</u><br><u>P02771</u>   |

### **GRIGENE** alpha 1 Fetoprotein (AFP) Mouse Monoclonal Antibody [Clone ID: OTI1E8] – TA501783S

**Background:** This gene encodes alpha-fetoprotein, a major plasma protein produced by the yolk sac and the liver during fetal life. Alpha-fetoprotein expression in adults is often associated with hepatoma or teratoma. However, hereditary persistance of alpha-fetoprotein may also be found in individuals with no obvious pathology. The protein is thought to be the fetal counterpart of serum albumin, and the alpha-fetoprotein and albumin genes are present in tandem in the same transcriptional orientation on chromosome 4. Alpha-fetoprotein is found in monomeric as well as dimeric and trimeric forms, and binds copper, nickel, fatty acids and bilirubin. The level of alpha-fetoprotein in amniotic fluid is used to measure renal loss of protein to screen for spina bifida and anencephaly. [provided by RefSeq]

Synonyms: AFPD; FETA; HPAFP

**Protein Families:** 

Druggable Genome, Secreted Protein

rotem rannies.

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY AFP ([RC206622], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-AFP. Positive lysates [LY400455] (100ug) and [LC400455] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-AFP monoclonal antibody.

Immunohistochemical staining of paraffinembedded Carcinoma of Human bladder tissue using anti-AFP mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA501783], Dilution 1:50)

HEK293T cells transfected with either [RC206622] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-AFP antibody ([TA501783]), and then analyzed by flow cytometry.
