# Product datasheet for TA501788BM

## alpha 1 Fetoprotein (AFP) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2E2]

#### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI2E2
Applications:	FC, IF, WB
Recommended Dilution:	WB: 1:200 - 1:1000, IF 1:100, FLOW 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human AFP (NP_001125) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	HRP
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	66.3 kDa
Gene Name:	alpha fetoprotein
Database Link:	<u>NP_001125</u> <u>Entrez Gene 174 Human</u>
	<u>P02771</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	alpha 1 Fetoprotein (AFP) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2E2] – TA501788BM
Background:	This gene encodes alpha-fetoprotein, a major plasma protein produced by the yolk sac and the liver during fetal life. Alpha-fetoprotein expression in adults is often associated with hepatoma or teratoma. However, hereditary persistance of alpha-fetoprotein may also be found in individuals with no obvious pathology. The protein is thought to be the fetal counterpart of serum albumin, and the alpha-fetoprotein and albumin genes are present in tandem in the same transcriptional orientation on chromosome 4. Alpha-fetoprotein is found in monomeric as well as dimeric and trimeric forms, and binds copper, nickel, fatty acids and bilirubin. The level of alpha-fetoprotein in amniotic fluid is used to measure renal loss of protein to screen for spina bifida and anencephaly. [provided by RefSeq]
Synonyms:	AFPD; FETA; HPAFP

**Protein Families:** 

Druggable Genome, Secreted Protein

## **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY AFP ([RC206622], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-AFP. Positive lysates [LY400455] (100ug) and [LC400455] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (10ug) from 7 different cell lines by using anti-AFP monoclonal antibody (1:200).

# alpha 1 Fetoprotein (AFP) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2E2] – TA501788BM

Anti-AFP mouse monoclonal antibody ([TA501788]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY AFP ([RC206622]).

HEK293T cells transfected with either [RC206622] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-AFP antibody ([TA501788]), and then analyzed by flow cytometry.
