PKC epsilon (PRKCE) Mouse Monoclonal Antibody [Clone ID: OTI1B7]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI1B7

Applications: FC, IF, IHC, WB

Recommended Dilution: WB 1:1000, IHC 1:150, IF 1:100, FLOW 1:100

Reactivity: Human, Dog, Monkey, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human PRKCE (NP_005391) produced in HEK293T

cell

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.

Concentration: 0.95 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 83.5 kDa

Gene Name: protein kinase C epsilon

Database Link: NP 005391

Entrez Gene 18754 MouseEntrez Gene 29340 RatEntrez Gene 609934 DogEntrez Gene 714533

Q02156

Background:

Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be activated by calcium and the second messenger diacylglycerol. PKC family members phosphorylate a wide variety of protein targets and are known to be involved in diverse cellular signaling pathways. PKC family members also serve as major receptors for phorbol esters, a class of tumor promoters. Each member of the PKC family has a specific expression profile and is believed to play a distinct role in cells. The protein encoded by this gene is one of the PKC family members. This kinase has been shown to be involved in many different cellular functions, such as neuron channel activation, apoptosis, cardioprotection from ischemia, heat shock response, as well as insulin exocytosis. Knockout studies in mice suggest that this kinase is important for lipopolysaccharide (LPS)-mediated signaling in activated macrophages and may also play a role in controlling anxiety-like behavior. [provided by RefSeq, Jul 2008]

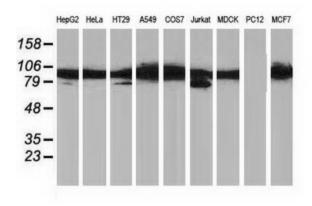

Synonyms: nPKC-epsilon; PKCE

Protein Families: Druggable Genome, Protein Kinase

Protein Pathways: Fc epsilon RI signaling pathway, Fc gamma R-mediated phagocytosis, Tight junction, Type II

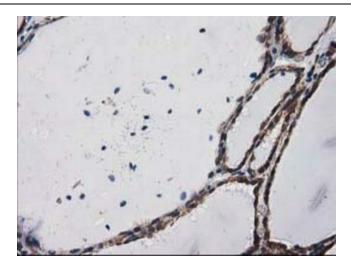

diabetes mellitus, Vascular smooth muscle contraction

Product images:

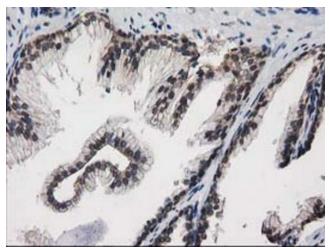

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-PRKCE monoclonal antibody (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human) (1:1000).

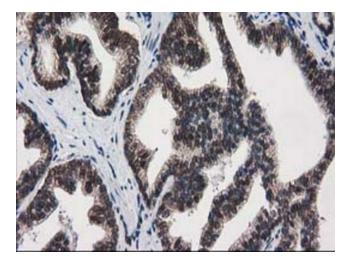

Immunohistochemical staining of paraffinembedded Human thyroid tissue within the normal limits using anti-PRKCE mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

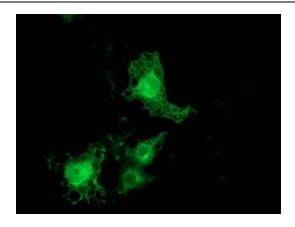

Immunohistochemical staining of paraffinembedded Human prostate tissue within the normal limits using anti-PRKCE mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

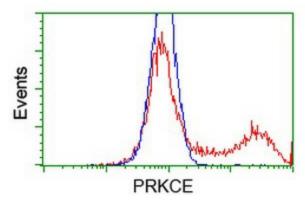

Immunohistochemical staining of paraffinembedded Carcinoma of Human prostate tissue using anti-PRKCE mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

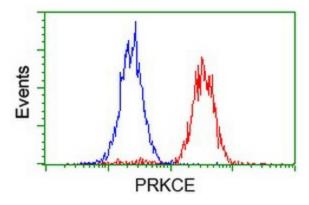

Anti-PRKCE mouse monoclonal antibody (TA502395) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY PRKCE ([RC217702]).

HEK293T cells transfected with either [RC217702] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-PRKCE antibody (TA502395), and then analyzed by flow cytometry.

Flow cytometric Analysis of Hela cells, using anti-PRKCE antibody (TA502395), (Red), compared to a nonspecific negative control antibody, (Blue).
