Product datasheet for TA502463M

Beta TRCP (BTRC) Mouse Monoclonal Antibody [Clone ID: OTI1F10]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1F10
Applications:	FC, WB
Recommended Dilution:	WB 1:2000, FLOW 1:100
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 52-354 of human BTRC(NP_378663) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.72 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	68.7 kDa
Gene Name:	beta-transducin repeat containing E3 ubiquitin protein ligase
Database Link:	<u>NP_378663</u> <u>Entrez Gene 12234 MouseEntrez Gene 361765 RatEntrez Gene 8945 Human</u> <u>Q9Y297</u>

Seta TRCP (BTRC) Mouse Monoclonal Antibody [Clone ID: OTI1F10] – TA502463M

Background:This gene encodes a member of the F-box protein family which is characterized by an
approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four
subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in
phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes:
Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing
either different protein-protein interaction modules or no recognizable motifs. The protein
encoded by this gene belongs to the Fbws class; in addition to an F-box, this protein contains
multiple WD-40 repeats. The encoded protein mediates degradation of CD4 via its interaction
with HIV-1 Vpu. It has also been shown to ubiquitinate phosphorylated NFKBIA (nuclear factor
of kappa light polypeptide gene enhancer in B-cells inhibitor, alpha), targeting it for
degradation and thus activating nuclear factor kappa-B. Alternatively spliced transcript
variants have been described. A related pseudogene exists in chromosome 6. [provided by
RefSeq, Mar

Synonyms:BETA-TRCP; betaTrCP; bTrCP; bTrCP1; FBW1A; FBXW1A; FWD1DescriptionDescription

Protein Families: Druggable Genome

Protein Pathways:

Hedgehog signaling pathway, Oocyte meiosis, Ubiquitin mediated proteolysis, Wnt signaling pathway

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY BTRC ([RC207025], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BTRC.

HEK293T cells transfected with either [RC207025] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-BTRC antibody ([TA502463]), and then analyzed by flow cytometry.
