Product datasheet for TA502464

Beta TRCP (BTRC) Mouse Monoclonal Antibody [Clone ID: OTI3D5]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI3D5
Applications:	IF, WB
Recommended Dilution:	WB 1:500, IF 1:100
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human fragment corresponding to amino acids 52-354 of human BTRC (NP_378663) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.75 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	68.7 kDa
Gene Name:	beta-transducin repeat containing E3 ubiquitin protein ligase
Database Link:	<u>NP_378663</u> <u>Entrez Gene 12234 MouseEntrez Gene 361765 RatEntrez Gene 8945 Human</u> <u>Q9Y297</u>

Seta TRCP (BTRC) Mouse Monoclonal Antibody [Clone ID: OTI3D5] – TA502464

Background:This gene encodes a member of the F-box protein family which is characterized by an
approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four
subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in
phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes:
Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing
either different protein-protein interaction modules or no recognizable motifs. The protein
encoded by this gene belongs to the Fbws class; in addition to an F-box, this protein contains
multiple WD-40 repeats. This protein is homologous to Xenopus bTrCP1, yeast Met30,
Neurospora Scon2 and Drosophila Slimb proteins. It interacts with HIV-1 Vpu and connects
CD4 to the proteolytic machinery. It also associates specifically with phosphorylated
lkappaBalpha and beta-catenin destruction motifs, probably functioning in multiple
transcriptional programs by activating the NF-kappaB pathway and inhibiting the beta-catenin
pathway. [provided by RefSeq]

Synonyms:BETA-TRCP; betaTrCP; bTrCP; bTrCP1; FBW1A; FBXW1; FBXW1A; FWD1Protein Families:Druggable GenomeProtein Pathways:Hedgehog signaling pathway, Oocyte meiosis, Ubiquitin mediated proteolysis, Wnt signaling

pathway

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY BTRC ([RC207025], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BTRC.

Anti-BTRC mouse monoclonal antibody (TA502464) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY BTRC ([RC207025]).
