

Product datasheet for TA502472M

VASP Mouse Monoclonal Antibody [Clone ID: OTI2G1]

Product data:

| Product Type: | Primary Antibodies |
|-------------------------|---|
| Clone Name: | OTI2G1 |
| Applications: | FC, IF, WB |
| Recommended Dilution: | WB 1:500~2000, IF 1:100, FLOW 1:100 |
| Reactivity: | Human, Mouse, Rat |
| Host: | Mouse |
| lsotype: | lgG1 |
| Clonality: | Monoclonal |
| Immunogen: | Full length human recombinant protein of human VASP (NP_003361) produced in HEK293T cell. |
| Formulation: | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. |
| Concentration: | 0.58 mg/ml |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Unconjugated |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Predicted Protein Size: | 39.6 kDa |
| Gene Name: | vasodilator stimulated phosphoprotein |
| Database Link: | <u>NP_003361</u> <u>Entrez Gene 22323 MouseEntrez Gene 361517 RatEntrez Gene 7408 Human</u> <u>P50552</u> |

ORIGENE VASP Mouse Monoclonal Antibody [Clone ID: OTI2G1] - TA502472M

| Background: | Vasodilator-stimulated phosphoprotein (VASP) is a member of the Ena-VASP protein family. |
|-------------|--|
| | Ena-VASP family members contain an EHV1 N-terminal domain that binds proteins containing |
| | E/DFPPPPXD/E motifs and targets Ena-VASP proteins to focal adhesions. In the mid-region of |
| | the protein, family members have a proline-rich domain that binds SH3 and WW domain- |
| | containing proteins. Their C-terminal EVH2 domain mediates tetramerization and binds both |
| | G and F actin. VASP is associated with filamentous actin formation and likely plays a |
| | widespread role in cell adhesion and motility. VASP may also be involved in the intracellular |
| | signaling pathways that regulate integrin-extracellular matrix interactions. VASP is regulated |
| | by the cyclic nucleotide-dependent kinases PKA and PKG. [provided by RefSeq] |
| - | |
| Synonyms: | vasodilator-stimulated phosphoprotein |

Protein Families: Druggable Genome, Stem cell - Pluripotency

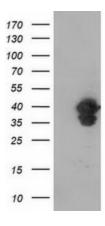

Protein Pathways: Fc gamma R-mediated phagocytosis, Focal adhesion, Leukocyte transendothelial migration

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY VASP ([RC203544], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-VASP. Positive lysates [LY401150] (100ug) and [LC401150] (20ug) can be purchased separately from OriGene.

Anti-VASP mouse monoclonal antibody ([TA502472]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY VASP ([RC203544]).

HEK293T cells transfected with either [RC203544] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-VASP antibody ([TA502472]), and then analyzed by flow cytometry.
