## Beta TRCP (BTRC) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI1A4]

### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI1A4
Applications: IF, WB

**Recommended Dilution:** WB 1:500, IF 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human fragment corresponding to amino acids 52-354 of human BTRC (NP\_378663)

produced in E.coli.

**Formulation:** PBS (pH 7.3) containing 1% BSA, 50% glycerol.

**Concentration:** 0.5 mg/ml

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: HRP

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

**Predicted Protein Size:** 68.7 kDa

**Gene Name:** beta-transducin repeat containing E3 ubiquitin protein ligase

Database Link: NP 378663

# Beta TRCP (BTRC) Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI1A4] – TA502524BM

Background:

This gene encodes a member of the F-box protein family which is characterized by an approximately 40 amino acid motif, the F-box. The F-box proteins constitute one of the four subunits of ubiquitin protein ligase complex called SCFs (SKP1-cullin-F-box), which function in phosphorylation-dependent ubiquitination. The F-box proteins are divided into 3 classes: Fbws containing WD-40 domains, Fbls containing leucine-rich repeats, and Fbxs containing either different protein-protein interaction modules or no recognizable motifs. The protein encoded by this gene belongs to the Fbws class; in addition to an F-box, this protein contains multiple WD-40 repeats. This protein is homologous to Xenopus bTrCP1, yeast Met30, Neurospora Scon2 and Drosophila Slimb proteins. It interacts with HIV-1 Vpu and connects CD4 to the proteolytic machinery. It also associates specifically with phosphorylated lkappaBalpha and beta-catenin destruction motifs, probably functioning in multiple transcriptional programs by activating the NF-kappaB pathway and inhibiting the beta-catenin pathway. [provided by RefSeq]

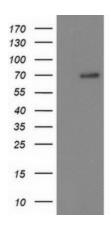

Synonyms: BETA-TRCP; betaTrCP; bTrCP; bTrCP1; FBW1A; FBXW1A; FWD1

**Protein Families:** Druggable Genome

Protein Pathways: Hedgehog signaling pathway, Oocyte meiosis, Ubiquitin mediated proteolysis, Wnt signaling

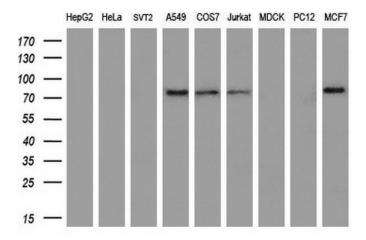

pathway

## **Product images:**

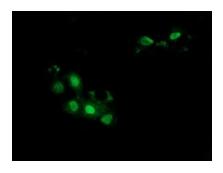

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY BTRC ([RC207025], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BTRC.

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-BTRC monoclonal antibody (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human) (1:200).

Anti-BTRC mouse monoclonal antibody ([TA502524]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY BTRC ([RC207025]).
