LMCD1 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI2F12]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI2F12
Applications: FC, WB

Recommended Dilution: WB 1:500, FLOW 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human LMCD1 (NP_055398) produced in HEK293T

cell

Formulation: PBS (pH 7.3) containing 1% BSA, 50% glycerol.

Concentration: 0.5 mg/ml

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: HRP

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 40.7 kDa

Gene Name: LIM and cysteine rich domains 1

Database Link: NP 055398

Entrez Gene 29995 Human

Q9NZU5

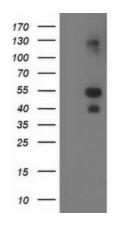

Background:

The protein encoded by this gene contains a cysteine-rich domain in the N-terminal region and 2 LIM domains in the C-terminal region. It also has several potential phosphorylation and N-myristoylation sites and a single potential N-glycosylation site. The presence of LIM domains implies involvement in protein-protein interactions. Expression of this gene has been detected in most tissues, with highest expression in skeletal muscle. Transcript variants utilizing alternative polyA signals have been observed. [provided by RefSeq]. COMPLETENESS: complete on the 3' end.

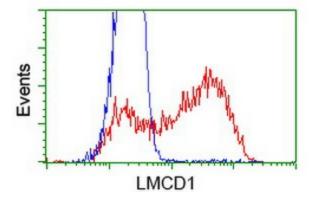

Synonyms:

dyxin; LIM and cysteine-rich domains 1

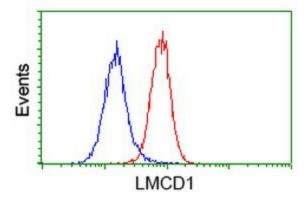

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY LMCD1 ([RC200062], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-LMCD1. Positive lysates [LY402349] (100ug) and [LC402349] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either [RC200062] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-LMCD1 antibody ([TA502789]), and then analyzed by flow cytometry.

Flow cytometric Analysis of Hela cells, using anti-LMCD1 antibody ([TA502789]), (Red), compared to a nonspecific negative control antibody, (Blue).
