# Product datasheet for TA502966AM

## SNAP25 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI4F3]

### **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI4F3   |
| Applications:           | FC, IF, WB   |
| Recommended Dilution:   | WB 1:2000, IF 1:100, FLOW 1:100  |
| Reactivity:             | Human, Mouse, Rat  |
| Host:                   | Mouse  |
| lsotype:                | lgG2a  |
| Clonality:              | Monoclonal   |
| Immunogen:              | Full length human recombinant protein of human SNAP25 (NP_003072) produced in<br>HEK293T cell.                 |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.   |
| Concentration:          | 0.5 mg/ml  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)      |
| Conjugation:            | Biotin   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 23.2 kDa   |
| Gene Name:              | synaptosome associated protein 25  |
| Database Link:          | <u>NP_003072</u><br><u>Entrez Gene 20614 MouseEntrez Gene 25012 RatEntrez Gene 6616 Human</u><br><u>P60880</u> |

#### SNAP25 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI4F3] – TA502966AM

Background:Synaptic vesicle membrane docking and fusion is mediated by SNAREs (soluble N-<br/>ethylmaleimide-sensitive factor attachment protein receptors) located on the vesicle<br/>membrane (v-SNAREs) and the target membrane (t-SNAREs). The assembled v-SNARE/t-<br/>SNARE complex consists of a bundle of four helices, one of which is supplied by v-SNARE and<br/>the other three by t-SNARE. For t-SNAREs on the plasma membrane, the protein syntaxin<br/>supplies one helix and the protein encoded by this gene contributes the other two. Therefore,<br/>this gene product is a presynaptic plasma membrane protein involved in the regulation of<br/>neurotransmitter release. Two alternative transcript variants encoding different protein<br/>isoforms have been described for this gene. [provided by RefSeq]

 Synonyms:
 bA416N4.2; dJ1068F16.2; RIC-4; RIC4; SEC9; SNAP; SNAP-25

Protein Families: Protein Pathways: Druggable Genome SNARE interactions in vesicular transport

#### **Product images:**

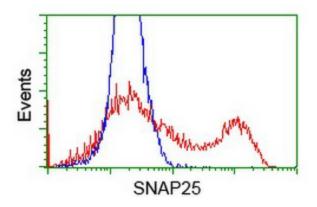

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY SNAP25 ([RC202068], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-SNAP25. Positive lysates [LY418912] (100ug) and [LC418912] (20ug) can be purchased separately from OriGene.

Anti-SNAP25 mouse monoclonal antibody ([TA502966]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY SNAP25 ([RC202068]).

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

HEK293T cells transfected with either [RC202068] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-SNAP25 antibody ([TA502966]), and then analyzed by flow cytometry.
