Product datasheet for TA503407

Apc2 (ANAPC2) Mouse Monoclonal Antibody [Clone ID: OTI1H8]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1H8
Applications:	FC, IF, WB
Recommended Dilution:	WB 1:500~2000, IF 1:100, FLOW 1:100
Reactivity:	Human, Rat, Mouse
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human ANAPC2(NP_037498) produced in HEk293 cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.38 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	93.6 kDa
Gene Name:	anaphase promoting complex subunit 2
Database Link:	NP_037498 Entrez Gene 99152 MouseEntrez Gene 296558 RatEntrez Gene 29882 Human Q9UJX6

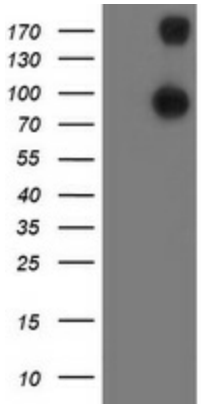
Background: A large protein complex, termed the anaphase-promoting complex (APC), or the cyclosome, promotes metaphase-anaphase transition by ubiquitinating its specific substrates such as mitotic cyclins and anaphase inhibitor, which are subsequently degraded by the 26S proteasome. Biochemical studies have shown that the vertebrate APC contains eight subunits. The composition of the APC is highly conserved in organisms from yeast to humans. The product of this gene is a component of the complex and shares sequence similarity with a recently identified family of proteins called cullins, which may also be involved in ubiquitin-mediated degradation. [provided by RefSeq]

Synonyms: APC2

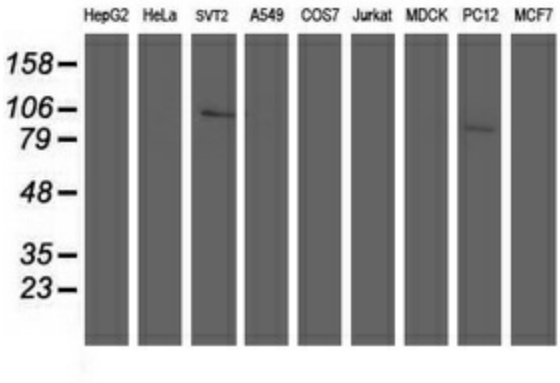
Protein Families: Druggable Genome

Protein Pathways: Cell cycle, Oocyte meiosis, Progesterone-mediated oocyte maturation, Ubiquitin mediated proteolysis

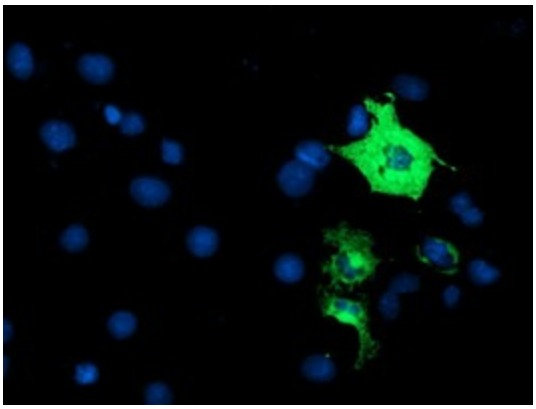
Product images:



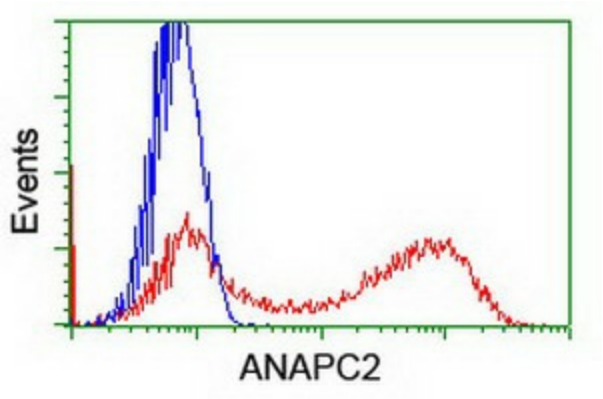
HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ANAPC2 ([RC207539], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ANAPC2. Positive lysates [LY402247] (100ug) and [LC402247] (20ug) can be purchased separately from OriGene.



Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-ANAPC2 monoclonal antibody.



Anti-ANAPC2 mouse monoclonal antibody (TA503407) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY ANAPC2 ([RC207539]).



HEK293T cells transfected with either [RC207539] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-ANAPC2 antibody (TA503407), and then analyzed by flow cytometry.
