#### Serigene PDE4 (PDE4B) Mouse Monoclonal Antibody [Clone ID: OTI3A10] – TA503532S

- Background:This gene is a member of the type IV, cyclic AMP (cAMP)-specific, cyclic nucleotide<br/>phosphodiesterase (PDE) family. Cyclic nucleotides are important second messengers that<br/>regulate and mediate a number of cellular responses to extracellular signals, such as<br/>hormones, light, and neurotransmitters. The cyclic nucleotide phosphodiesterases (PDEs)<br/>regulate the cellular concentrations of cyclic nucleotides and thereby play a role in signal<br/>transduction. This gene encodes a protein that specifically hydrolyzes cAMP. Altered activity<br/>of this protein has been associated with schizophrenia and bipolar affective disorder.<br/>Alternate transcriptional splice variants, encoding different isoforms, have been<br/>characterized. [provided by RefSeq]
- Synonyms: DPDE4; PDE4B5; PDEIVB

Protein Families: Druggable Genome

Protein Pathways:

Progesterone-mediated oocyte maturation, Purine metabolism

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PDE4B ([RC211956], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PDE4B. Positive lysates [LY400919] (100ug) and [LC400919] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-PDE4B monoclonal antibody.

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human breast tissue using anti-PDE4B mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA503532])

Immunohistochemical staining of paraffinembedded Human pancreas tissue within the normal limits using anti-PDE4B mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA503532])

HEK293T cells transfected with either [RC211956] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-PDE4B antibody ([TA503532]), and then analyzed by flow cytometry.
