Product datasheet for TA503591M

CDKN3 Mouse Monoclonal Antibody [Clone ID: OTI2H1]

Product data:

| Due du et Turner | Dringer, Antike dieg |
|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Type: | Primary Antibodies |
| Clone Name: | OTI2H1 |
| Applications: | FC, IHC, WB |
| Recommended Dilution: | WB 1:500, IHC 1:150, FLOW 1:100 |
| Reactivity: | Human, Mouse |
| Host: | Mouse |
| lsotype: | lgG2a |
| Clonality: | Monoclonal |
| Immunogen: | Full length human recombinant protein of human CDKN3(NP_005183) produced in HEK293T cell. |
| Formulation: | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide. |
| Concentration: | 1 mg/ml |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Unconjugated |
| Storage: | Store at -20°C as received. |
| Stability: | Stable for 12 months from date of receipt. |
| Predicted Protein Size: | 23.6 kDa |
| Gene Name: | cyclin dependent kinase inhibitor 3 |
| Database Link: | <u>NP_005183</u> <u>Entrez Gene 72391 MouseEntrez Gene 1033 Human</u> <u>Q16667</u> |
| Background: | The protein encoded by this gene belongs to the dual specificity protein phosphatase family. It was identified as a cyclin-dependent kinase inhibitor, and has been shown to interact with, and dephosphorylate CDK2 kinase, thus prevent the activation of CDK2 kinase. This gene was reported to be deleted, mutated, or overexpressed in several kinds of cancers. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq] |

CDKN3 Mouse Monoclonal Antibody [Clone ID: OTI2H1] – TA503591M

Synonyms: CDI1; CIP2; KAP; KAP1

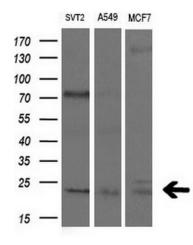

Protein Families:

Druggable Genome, Phosphatase

Product images:

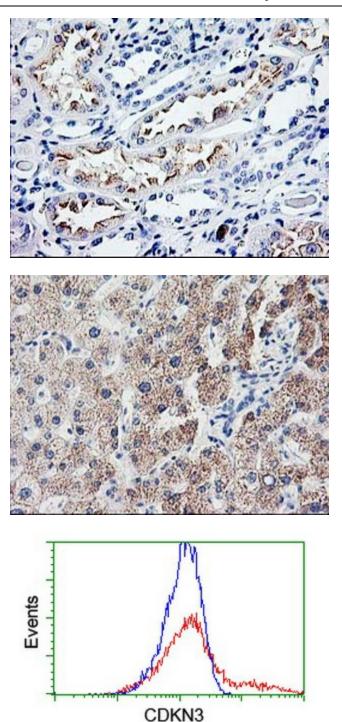

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CDKN3 ([RC213080], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CDKN3. Positive lysates [LY417450] (100ug) and [LC417450] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (10ug) from 3 different cell lines by using anti-CDKN3 monoclonal antibody at 1:200 dilution.

Immunohistochemical staining of paraffinembedded Human Kidney tissue within the normal limits using anti-CDKN3 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Human liver tissue within the normal limits using anti-CDKN3 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

HEK293T cells transfected with either [RC213080] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-CDKN3 antibody ([TA503591]), and then analyzed by flow cytometry.
