Product datasheet for TA503653

Ribophorin I (RPN1) Mouse Monoclonal Antibody [Clone ID: OTI2G9]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2G9
Applications:	FC, WB
Recommended Dilution:	WB 1:200 - 1:1000, FLOW 1:100
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human RPN1(NP_002941) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.35 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	66.2 kDa
Gene Name:	ribophorin I
Database Link:	<u>NP_002941</u> Entrez Gene 25596 RatEntrez Gene 6184 Human P04843
Background:	This gene encodes a type I integral membrane protein found only in the rough endoplasmic reticulum. The encoded protein is part of an N-oligosaccharyl transferase complex that links high mannose oligosaccharides to asparagine residues found in the Asn-X-Ser/Thr consensus motif of nascent polypeptide chains. This protein forms part of the regulatory subunit of the 26S proteasome and may mediate binding of ubiquitin-like domains to this proteasome. [provided by RefSeq]

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY RPN1 ([RC201554], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-RPN1. Positive lysates [LY418997] (100ug) and [LC418997] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either [RC201554] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-RPN1 antibody (TA503653), and then analyzed by flow cytometry.
