Product datasheet for TA503912

CENPH Mouse Monoclonal Antibody [Clone ID: OTI2A11]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2A11
Applications:	FC, IF, WB
Recommended Dilution:	WB 1:2000, IF 1:100, FLOW 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CENPH(NP_075060) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.88 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	28.3 kDa
Gene Name:	centromere protein H
Database Link:	<u>NP_075060</u> <u>Entrez Gene 64946 Human</u> <u>Q9H3R5</u>

GRIGENE CENPH Mouse Monoclonal Antibody [Clone ID: OTI2A11] – TA503912

- Background: Centromere and kinetochore proteins play a critical role in centromere structure, kinetochore formation, and sister chromatid separation. The protein encoded by this gene colocalizes with inner kinetochore plate proteins CENP-A and CENP-C in both interphase and metaphase. It localizes outside of centromeric heterochromatin, where CENP-B is localized, and inside the kinetochore corona, where CENP-E is localized during prometaphase. It is thought that this protein can bind to itself, as well as to CENP-A, CENP-B or CENP-C. Multimers of the protein localize constitutively to the inner kinetochore plate and play an important role in the organization and function of the active centromere-kinetochore complex. [provided by RefSeq, Jul 2008]
- Synonyms: centromere protein H; homolog; kinetochore protein CENP-H; MIND kinetochore complex component; NNF1; PMF1

Protein Families: Druggable Genome

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CENPH ([RC204531], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CENPH. Positive lysates [LY402956] (100ug) and [LC402956] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (35ug) from 9 different cell lines by using anti-CENPH monoclonal antibody (HepG2: human; HeLa: human; SVT2: mouse; A549: human; COS7: monkey; Jurkat: human; MDCK: canine; PC12: rat; MCF7: human).

Anti-CENPH mouse monoclonal antibody (TA503912) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY CENPH ([RC204531]).

HEK293T cells transfected with either [RC204531] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-CENPH antibody (TA503912), and then analyzed by flow cytometry.
