# Product datasheet for TA504027BM

# TPSG1 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI1E6]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI1E6
Applications:	FC, WB
Recommended Dilution:	WB 1:2000, FLOW 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 20-283 of human TPSG1(NP_036599) produced in E.coli.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol.
Concentration:	0.5 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	HRP
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	32 kDa
Gene Name:	tryptase gamma 1
Database Link:	<u>NP_036599</u> <u>Entrez Gene 25823 Human</u> <u>Q9NRR2</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### CRIGENE TPSG1 Mouse Monoclonal Antibody (HRP conjugated) [Clone ID: OTI1E6] – TA504027BM

Background:Tryptases comprise a family of trypsin-like serine proteases, the peptidase family S1.<br/>Tryptases are enzymatically active only as heparin-stabilized tetramers, and they are resistant<br/>to all known endogenous proteinase inhibitors. Several tryptase genes are clustered on<br/>chromosome 16p13.3. There is uncertainty regarding the number of genes in this cluster.<br/>Currently four functional genes - alpha I, beta I hota I has an allelic variant beta II has an allelic variant named alpha II, beta II has an allelic variant beta III, also<br/>gamma I has an allelic variant gamma II. Beta tryptases appear to be the main isoenzymes<br/>expressed in mast cells; whereas in basophils, alpha-tryptases predominant. This gene differs<br/>from other members of the tryptase gene family in that it has C-terminal hydrophobic<br/>domain, which may serve as a membrane anchor. Tryptases have been implicated as<br/>mediators in the pathogenesis of asthma and other allergic and inflammatory disorders.<br/>[provided by RefSeq]. COMPLETENESS: complete on the 3' end.

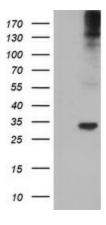

Synonyms: PRSS31; TMT; trpA

**Protein Families:** 

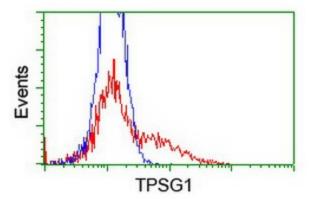

Кэээт, нип, црА

nilies: Druggable Genome, Transmembrane

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TPSG1 ([RC222359], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TPSG1. Positive lysates [LY402219] (100ug) and [LC402219] (20ug) can be purchased separately from OriGene.

HEK293T cells transfected with either [RC222359] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-TPSG1 antibody ([TA504027]), and then analyzed by flow cytometry.
