# Product datasheet for TA504161AM

# TPSG1 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI1G1]

## **Product data:**

| Product Type:           | Primary Antibodies                                                                                                      |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Clone Name:             | OTI1G1                                                                                                                  |
| Applications:           | FC, IHC, WB                                                                                                             |
| Recommended Dilution:   | WB 1:2000, IHC 1:150, FLOW 1:100                                                                                        |
| Reactivity:             | Human                                                                                                                   |
| Host:                   | Mouse                                                                                                                   |
| lsotype:                | lgG1                                                                                                                    |
| Clonality:              | Monoclonal                                                                                                              |
| Immunogen:              | Human recombinant protein fragment corresponding to amino acids 20-283 of human<br>TPSG1(NP_036599) produced in E.coli. |
| Formulation:            | PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.                                                    |
| Concentration:          | 0.5 mg/ml                                                                                                               |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)            |
| Conjugation:            | Biotin                                                                                                                  |
| Storage:                | Store at -20°C as received.                                                                                             |
| Stability:              | Stable for 12 months from date of receipt.                                                                              |
| Predicted Protein Size: | 32 kDa                                                                                                                  |
| Gene Name:              | tryptase gamma 1                                                                                                        |
| Database Link:          | <u>NP_036599</u><br><u>Entrez Gene 25823 Human</u><br><u>Q9NRR2</u>                                                     |

#### CRIGENE TPSG1 Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI1G1] – TA504161AM

Background:Tryptases comprise a family of trypsin-like serine proteases, the peptidase family S1.<br/>Tryptases are enzymatically active only as heparin-stabilized tetramers, and they are resistant<br/>to all known endogenous proteinase inhibitors. Several tryptase genes are clustered on<br/>chromosome 16p13.3. There is uncertainty regarding the number of genes in this cluster.<br/>Currently four functional genes - alpha I, beta I, beta II and gamma I - have been identified.<br/>And beta I has an allelic variant named alpha II, beta II has an allelic variant beta III, also<br/>gamma I has an allelic variant gamma II. Beta tryptases appear to be the main isoenzymes<br/>expressed in mast cells; whereas in basophils, alpha-tryptases predominant. This gene differs<br/>from other members of the tryptase gene family in that it has C-terminal hydrophobic<br/>domain, which may serve as a membrane anchor. Tryptases have been implicated as<br/>mediators in the pathogenesis of asthma and other allergic and inflammatory disorders.<br/>[provided by RefSeq, Jul 2008]. COMPLETENESS: complete on the 3' end.

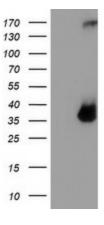

Synonyms: PRSS31; TMT; trpA

**Protein Families:** 

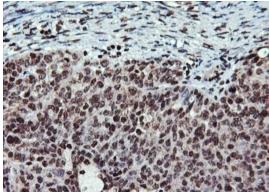

К5551, ПМП, ЦРА

ilies: Druggable Genome, Transmembrane

### **Product images:**

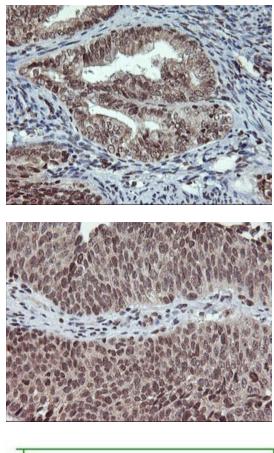

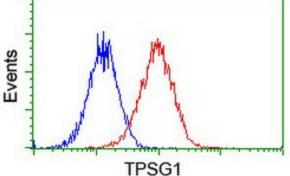

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY TPSG1 (Cat# [RC222359], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TPSG1(Cat# [TA504161]). Positive lysates [LY402219] (100ug) and [LC402219] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human ovary tissue using anti-TPSG1 mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA504161])

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human endometrium tissue using anti-TPSG1 mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA504161])

Immunohistochemical staining of paraffinembedded Carcinoma of Human bladder tissue using anti-TPSG1 mouse monoclonal antibody. (Heat-induced epitope retrieval by 10mM citric buffer, pH6.0, 100°C for 10min, [TA504161])

Flow cytometric Analysis of Hela cells, using anti-TPSG1 antibody ([TA504161]), (Red), compared to a nonspecific negative control antibody, (Blue).

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Flow cytometric Analysis of Jurkat cells, using anti-TPSG1 antibody ([TA504161]), (Red), compared to a nonspecific negative control antibody, (Blue).
