## GIRK1 (KCNJ3) Mouse Monoclonal Antibody (Biotin conjugated) [Clone ID: OTI1G3] – TA504197AM

#### Background: Potassium channels are present in most mammalian cells, where they participate in a wide range of physiologic responses. The protein encoded by this gene is an integral membrane protein and inward-rectifier type potassium channel. The encoded protein, which has a greater tendency to allow potassium to flow into a cell rather than out of a cell, is controlled by G-proteins and plays an important role in regulating heartbeat. It associates with three other G-protein-activated potassium channels to form a heteromultimeric pore-forming complex. [provided by RefSeq]

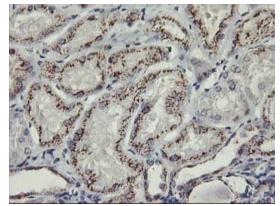

#### Synonyms: GIRK1; KGA; KIR3.1

Protein Families: Druggable Genome, Ion Channels: Potassium, Transmembrane

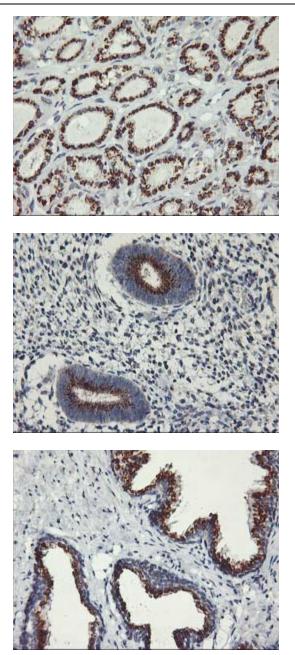

#### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY KCNJ3 ([RC205322], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-KCNJ3. Positive lysates [LY400811] (100ug) and [LC400811] (20ug) can be purchased separately from OriGene.
