## Product datasheet for TA504269

### Cystatin SA (CST2) Mouse Monoclonal Antibody [Clone ID: OTI5E1]

#### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI5E1
Applications:	WB
Recommended Dilution:	WB 1:500
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CST2(NP_001313) produced in HEK293T cell.
Formulation:	PBS (pH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	0.55 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	14.3 kDa
Gene Name:	cystatin SA
Database Link:	<u>NP_001313</u> <u>Entrez Gene 1470 Human</u> <u>P09228</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### Cystatin SA (CST2) Mouse Monoclonal Antibody [Clone ID: OTI5E1] – TA504269 Cystatin SA (CST2) Mouse Monoclonal Antibody [Clone ID: OTI5E1] – TA504269

Background:The cystatin superfamily encompasses proteins that contain multiple cystatin-like sequences.<br/>Some of the members are active cysteine protease inhibitors, while others have lost or<br/>perhaps never acquired this inhibitory activity. There are three inhibitory families in the<br/>superfamily, including the type 1 cystatins (stefins), type 2 cystatins and the kininogens. The<br/>type 2 cystatin proteins are a class of cysteine proteinase inhibitors found in a variety of<br/>human fluids and secretions, where they appear to provide protective functions. The cystatin<br/>locus on chromosome 20 contains the majority of the type 2 cystatin genes and<br/>pseudogenes. This gene is located in the cystatin locus and encodes a secreted thiol protease<br/>inhibitor found at high levels in saliva, tears and seminal plasma. [provided by RefSeq]

Synonyms: MGC71924

Secreted Protein

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CST2 ([RC209350], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CST2. Positive lysates [LY420010] (100ug) and [LC420010] (20ug) can be purchased separately from OriGene.
